## **The All New UB-1018**

The Union Built PC UB-1018 - “The Organizer” - Quad-Core 10.1 inch Android Tablet is our first 3G enabled tablet boasting WiFi and Bluetooth for all of your personal digital connections. The Organizer comes with dual sim card slots and a 1280 x 800 high definition IPS screen.

## **Connect to The World!**

We are raising the bar with the fast and dependable The Organizer. The Google play store gives you access to the programs you use most. And with 3G, you are always connected. All of this is brought to you through the most recent version of the Android operating system; 4.4 KitKat.

Powered by Android 4.4 KitKat and the MediaTek MT8382 Quad-Core Processor, compliment the 1GB of DDR3 RAM and 16GB of on board storage with more space using the SD card slot that can support up to 32GB more storage.

Dual Cameras - a 2MP on the front and 5MP with flash on the rear - as well as dual speakers on the back are perfect for picture taking, uploading and storing photos, video chatting and listening to music. An Android purist’s delight!

A 10.1 inch 1280 x 800 high definition IPS screen is viewable from all angles making The Organizer perfect for watching movies and television shows and great for gaming.

We want you to enjoy our products hassle free so, like all Union Built PC Hardware, we back The Organizer with our 1 year warranty on all factory defects.

Connect to the world with built in WiFi and Bluetooth 4.0 and onboard 3G support with dual SIM card slots. The Organizer is unlocked and supports all of the major frequencies in the United States, Europe and Asia – 850, 1900, 2100mhz.

## IBEW Local 351

“As the new assistant training Director I was fortunate to be involved with every aspect of this project including helping to explain our online and multimedia training needs at the new JATC.

The Computers and components engineered for us by Union Built PC were spot on! We spoke at length about the needs for our instructors and students to be on the web due to the new LMS and Blended learning programs being launched this year by the National Joint Apprenticeship Training Committee, and wanted to ensure we had enough in the way of bandwidth and networking flexibility to make it all happen.

The system they designed was set up to be user friendly for students, instructors and the administration. We are pleased with the product and the technical assistance we received from Union Built PC on this new building.

As for training so far there have been no problems with staff picking up and using hardware and software supplied to us, and we expect to launch the new curriculum this Fall with no issues.”

- Lou Jiapello, Assistant Training Director
