FeedWind, a major player in the RSS widget software market, has reached a major milestone with the announcement that **there are now over 100,000 unique domains using FeedWind** and an installed base of over a million active widgets.

“ The team has worked extremely hard to reach the 100,000 unique domain milestone and is optimistic that FeedWind will enjoy continued growth throughout 2015 and beyond, with a new version due out later this year. ”

Mikle Inc. President Jaehong Lee expressed his delight at hearing the news. “The team has worked extremely hard to reach the 100,000 unique domain milestone and is optimistic that FeedWind will enjoy continued growth throughout 2015 and beyond with a new version due out later this year. This new development should establish FeedWind as a primary choice for developers who require RSS widget technologies.” Domains that FeedWind serves include high profile users such as Linux.org, the US NIH, US government, universities, leading brands and major organizations from across the globe.

COMPANY BACKGROUND

FeedWind is the brainchild of Mikle Inc., an international team of software developers based in Honolulu and a subsidiary of Mikle KK., Japan. The core development team is based in Tokyo, with other contributors working from Bangladesh, Czech Republic, South Korea, UK, and USA. Working around three intercontinental time zones, the FeedWind team has met many challenges in order to reach this 100,000+ unique domain milestone. Now in its 8th year of development, FeedWind has become a mature product resulting from many thousands of development hours. The team continues to redefine and add new features to FeedWind in order to deliver an advanced RSS widget which appeals to as many users as possible.

Here are the numbers from the FeedWind server's analytics system: [FeedWind Analytics information 2013-2015](#). Version 2.0 will have fully integrated analytics so users will be able to measure performance and traffic sources for their widgets.

TOP 10 NETFLIX MOVIES

Blood Diamond
 In war-ravaged Sierra Leone, diamond smuggler Danny Archer learns that a local fisherman has stumbled upon a gigantic gem, and he offers to reunite the man with his family in exchange for the diamond.

The Dark Knight
 In this sequel to Batman Begins, the caped crusader teams with Lt. James Gordon and District Attorney Harvey Dent to continue dismantling Gotham City's criminal organizations. But a new villain kno...

CUSTOM RSS WIDGET BY FEEDWIND

THE DEVELOPERS CHOICE

[FeedWind](#) has rapidly become the RSS reader widget of choice partly because it is easy to use but also because FeedWind does not convey advertising or display branding. Under the hood is the ability to implement considerable customization to extend its capabilities and design. FeedWind has become a world-standard for displaying summarized, syndicated information from blogs, social networks, directories, video channels, calendar/event feeds, news feeds and any other XML-enabled source that complies with Atom/RSS standards. This ensures that FeedWind can be used by all genres of developer - from those using simple drag-drop/wysiwyg editors to produce their sites, to professional web programmers who code complex pages and creative designs. FeedWind has become

The screenshot shows a FeedWind RSS widget with a dark theme. It features two main article thumbnails on the left and a list of news items on the right. The first thumbnail shows a Linux penguin with the word 'linux+' and the title 'Linux+: Applications 05 – Yum Install, Update a...'. The second thumbnail shows two penguins and the title 'Fixing Missing Characters and Font Issues'. The right sidebar contains a 'Linux News Pro' section with several news items, including 'Development Release: Evolve OS Beta 1.1' and 'Red Hat Developer Toolset 3.1 beta arrives'. Below the news items is a 'Forum Statistics' section.

popular because it is customizable through CSS for advanced users, but also easy to use for basic users.

LOOKING AHEAD

With version 2.0 on the horizon for 2015, FeedWind meets the growing demand for RSS users who need to aggregate and syndicate information from one or more online sources. Those who need an RSS feed displayed anywhere on their website can try FeedWind with no registration/payment required - at <http://feed.mikle.com>.
