WHAT WE DO

IT Consulting & Solutions
Our team has decades of experience in designing, managing and implementing successful technology projects. We offer leading IT solutions in data backup, server virtualization, collaboration, Voice-over-IP, network security and cloud computing.

Technical Support
Through our mPOWER Business program, our team provides responsive help desk and on-site support services, server and network administration, plus IT consulting for a predictable monthly subscription.

24x7 Remote Monitoring
We monitor and manage your network devices, servers, workstations, data backup, network security, and any other IT-related products or services that your business relies upon to ensure around-the-clock coverage.

Scheduled Maintenance
Our mPOWER Business program also provides regularly-scheduled maintenance to ensure all patches and updates are properly applied to your servers, workstations and network equipment for maximum performance and security.

Sales and Procurement
For new purchases and technology solutions, we offer comprehensive procurement and financing services. We maintain relations with the industry's leading vendors and distributors, allowing us to provide complete design, configuration, financing, shipment and deployment services to nearly any location across the country.

Quarterly Business Reviews
We conduct Quarterly Business Reviews to assess current and upcoming projects, review budgeting and resources for technology-related initiatives, and to strategically plan for future IT needs.

Creative Services
We provide website design, internet marketing, and graphics design services to increase your company's revenue by creating online campaigns and marketing material that reinforces your company's brand and delivers targeted marketing to existing and prospective clients.

ABOUT OUR FIRM

machineLOGIC has been providing IT consulting and technical services to small and medium-sized businesses in the Denver Metro area since 2001.

Our team functions as your full-time IT staff at a part-time cost. We offer a number of flexible support options to accommodate any technology need in a wide variety of business environments.

Our technology solutions are based on products from industry leading vendors, including HP, Cisco, Microsoft, Amazon and many others. To complement our solutions, we provide technical services such as server and network administration, onsite technical support, and 24x7 monitoring to ensure your business infrastructure runs smoothly.

In addition, we offer creative design and internet marketing services that enable our clients to deliver high-impact web advertising and print marketing to their target audience.

WHAT OUR CLIENTS ARE SAYING

"I think it comes down to trust. We trust machineLOGIC. They are very responsive to our needs, and we know that when they make a recommendation on a new product or service, it is in our best interest."

Susan, practice administrator at denver-based surgical specialist

"machineLOGIC's service is second to none. We always know that they are keeping a close eye on our systems. They even called us to let us know that a potential issue was resolved before it impacted our business by restoring our internet connection over a weekend. Our staff was up and running on Monday without any interruptions."

Kristie, Partner at a Denver-based Landscape Architecture Firm

"Dan and his team at machineLOGIC are thorough and very responsive. I don't like to be "sold to," and I feel I can talk to them openly about our needs. I have looked at other vendors but machineLOGIC came out ahead. Others were sales and margin oriented. It was hard to get straight answers out of them. machineLOGIC looks out for what is best for our company."

Jason, IT Manager at a Colorado-based Health Care Provider

"machineLOGIC came highly recommended by another law firm and since we started working with them, we haven't had a single problem they couldn't fix quickly and efficiently."

Jon, Managing Partner at a Denver-based Law Firm
