# TrailerMate™

Asset & Trailer Tracking Solutions

Track your high-value cargo independently of your driver and receive theft, tampering, or geofence violation notifications instantly.

Quickly and easily identify the exact location of every asset in your fleet with TrailerMate™ from CarrierWeb®

Comprehensive look at trailer location

With TrailerMate™, you have complete visibility of where your assets are and how they are being utilized with pre-set alerts that notify you automatically in the instances of unplanned stops, deviations from a route time geofence, and tampering. Notifications are real-time to your phone or email. The trailer location and status information ensures your cargo remains safe and secure.

Multi-sided landmarks for increased accuracy

Improve visibility into operations & save fuel

By knowing the location of your trailers, TrailerMate will reduce driver search time and save driver hours. TrailerMate provides a window into trailer utilization ensuring optimal use of trailers.

Improve customer service

With TrailerMate, you are able to create "landmarks" that automatically show when the trailer you are tracking arrives and departs. It will also alert when a trailer has reached the maximum stay time that you have pre-defined. It will also help you manage by predefined trailer pools the number of trailers you have in a particular landmark.

Safe and Secure Cargo

With the CarrierWeb trailer location and status information, you are aware of where your cargo is, how it is being handled, and if it is safe and secure.

CARRIERWEB®

Gain insight and complete visibility to every asset in your fleet with TrailerMate.

TrailerMate™

Experience the Advantage

TrailerMate™ gathers data and then reports the information via the web such as:

- Precise location of trailer
- Landmarks and geofencing
- Dwell time reporting
- Trailer status (hooked or not)
- Trailer position and activity history
- Battery voltage

Single screen for visibility of all trailer data

		Trailer	⬇ Time	Last known position	HITCH	External Bat...	Internal Batt...	Speed	Direction

The TrailerMate rechargeable battery pack trailer tracking device is designed for reliable, multi-year deployments. It is the ideal solution for managing assets that are normally tethered to 12 or 24 volt systems but may sit idle for extended periods.

TrailerMate battery/wired trailer & asset tracking

- 3.8 Ah lithium ion rechargeable battery pack (recharged from the 7-way)
- Built-in GPS antenna for easy installation
- 3 inputs, 3 outputs
- Motion sensing through built-in, 3 axis accelerometer
- Over-the-air firmware update
- Web-based device management
- Operates on dry van and flat bed trailer types
