UnifiedCT Meeting Control Software

A powerful tool to help you simplify your complex online meeting environment

Making both on-premise and Office 365 deployments of Skype For Business/MS Lync dynamic & easy to control from any windows computer.

www.UnifiedCT.com

Powerful Meeting Room Control Software

Created specifically for Skype for Business (Microsoft Lync) and Office 365 users. This meeting room control software turns a regular Windows PC into a video conferencing control center. Leveraging resource booking technology from MS exchange, Office 365 or Google Calendar the software enhances dynamic conferencerooms by adding seamless integration for the platforms that matter to you.

Easy to Use

Top 30% of the screen elegantly displays your meeting room calendar. Simply click on a scheduled meeting to view details or launch your Skype for Business, GoToMeeting, WebEX, Zoom.US or other video meeting.

Intuitive Interface

Integrating all the essential compents of an important meeting into onescreen. All your meetings, calendar events, Exchange calendar attachments and links are integrated into one clean interface.

Full Feature List

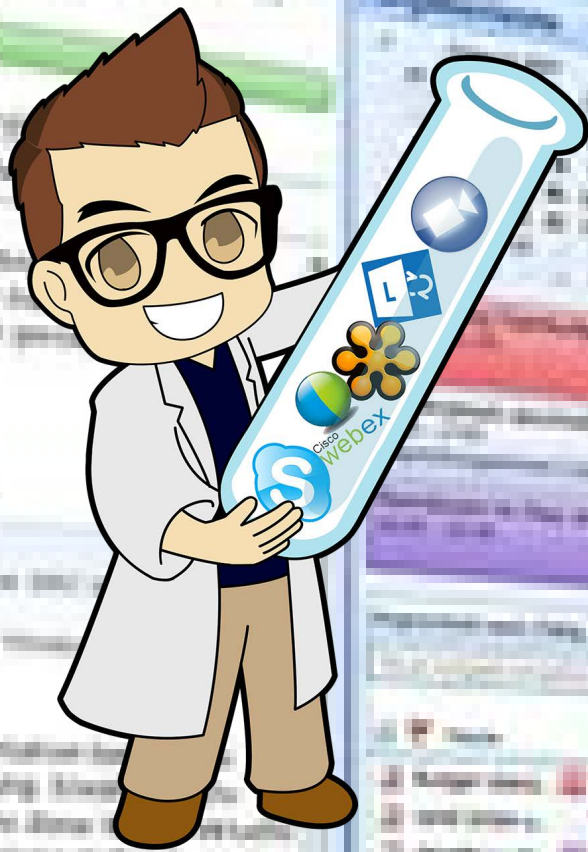

The full feature list is available at UnifiedCT.com. Releases/Updates are issued quarterly with optional upgraded features for all users with active software maintenance agreements.

30 Day Demo

We offer a free 30 day demo you can install on any Windows machine to host your Skype for Business video conference calls. Downloading our free 30 day trial will prove just how easy this software is to integrate.

Installation Options

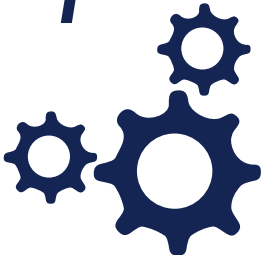

Locked Down Mode:
Launches at startup for full IT control over windows OS. This is the most user friendly and secure method.

Run as an Application:
Simply install software on your existing windows machine and launch the application when you're ready to run your video conferences.
