

Whirlwind[®] Mobile Air Classifier

The world's first and only 100% mobile classifying plant with integral collapsible conveyors

**Park to
Processing
in 1 hour**

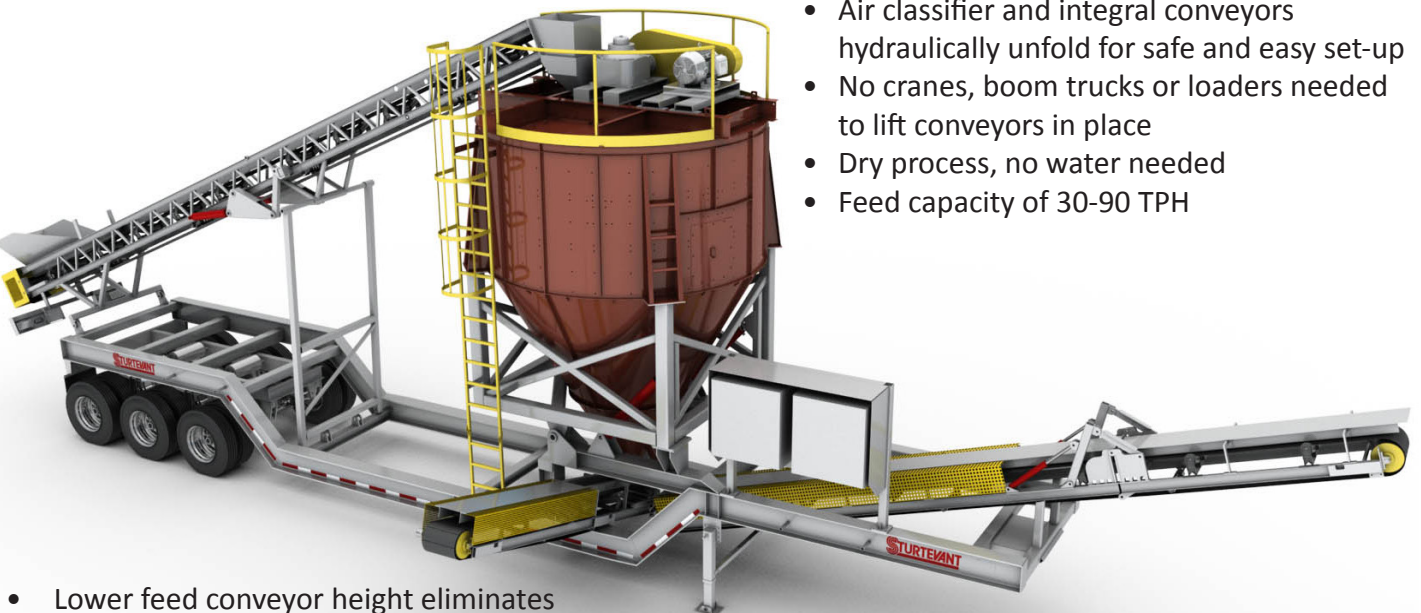

Easy to Transport

- Air classifier and integral conveyors hydraulically fold away for safe and easy break down and transport
- No cranes, boom trucks or loaders needed to ready conveyors for transport

- Compact design goes to any job site and reduces transportation costs
- Rugged chassis frame with heavy duty tri-axle suspension
- Dual hydraulic cylinders for raising and lowering air classifier and conveyors

Minimal Set-up Time

- Air classifier and integral conveyors hydraulically unfold for safe and easy set-up
- No cranes, boom trucks or loaders needed to lift conveyors in place
- Dry process, no water needed
- Feed capacity of 30-90 TPH

- Lower feed conveyor height eliminates the need for intermediate conveyor
- Durable construction, low maintenance
