RateLinx Named to Inbound Logistics Top 100 Logistics IT Providers List of 2015

MADISON, WI (June 15, 2015) – RateLinx, a thought leader in customized shipping and logistics management software tools and consulting, has been chosen by *Inbound Logistics* for the Top 100 Logistics IT Providers list of 2015. The annual list recognizes providers whose solutions are central to solving transportation, logistics, and supply chain challenges, and whose customer successes are well-documented.

RateLinx was selected by *Inbound Logistics* editors based on submitted questionnaires and other sources, lauding the company's ability to offer customized and integrated solutions designed to meet business logistics managers' supply chain challenges.

“We are honored to be recognized as a national leader in Logistics IT,” said Shannon Vaillancourt, President of RateLinx. “We are always focused on our customer's success. Whether they are a small business or Fortune 500, RateLinx software serves them like no other.”

About RateLinx

Since 2002, RateLinx has been a thought leader in customized shipping and logistics management software tools and consulting. From its headquarters in Madison, WI, RateLinx provides the only solution that standardizes datasets to connect procurement, processing and payment. This reduces shipping costs, increases efficiency and improves carrier relations. The RateLinx Enterprise Suite integrates with any ERP/WMS leveraging big data and predictive analytics to provide actionable Integrated Shipping IntelligenceSM. Designed for volumes of 25 to 250,000 shipments per day, the multi-carrier, multi-modal, multi-location software tools are web- or premise-based to monitor performance by product line, sales channel or by entity. More about RateLinx' thought-leading approach to logistics is available at www.ratelinx.com/blog.

About Inbound Logistics

Since its inception in 1981, Inbound Logistics' educational mission is to illustrate the benefits of demand-driven logistics practices, give companies the knowledge to help them match the inbound flow of materials to their demand, and align their business process to support that shift. Inbound Logistics offers real-world examples and decision support to guide businesses to efficiently manage logistics, reduce and speed inventory, and offset rising transport costs, supporting business scalability across their value chain.
