

# Schindler and Solar Impulse partner to power sustainable mobility

## Shared passion for innovation

Just as Solar Impulse is testing the limits of human exploration with the first round-the-world solar flight, Schindler is pushing the boundaries of how we view mobility in the cities of tomorrow. This shared culture of innovation and pioneering spirit makes the two natural partners and is the force that drives their tireless pursuit of more sustainable mobility.

# Schindler

MAIN PARTNER

## SOLARIMPULSE

## Engineering expertise

To get the plane off the ground, Solar Impulse started **12 years ago**, and has a team of over **50 engineers and technicians**, **80 technology partners** and more than **100 advisors and suppliers**.

Schindler is a leading global manufacturer of elevators and escalators with more than **140 years** of engineering expertise and **54,000 employees** that help move more than **1 billion people** every day all over the world.

## Sustainable mobility

As demands on mobility grow and fuel resources dwindle and become more expensive, mankind's future lies in using clean, sustainable energy from renewable sources. Schindler's destination-dispatching system **1**, machine room-less elevators **2**, regenerative drives **3**, the solar elevator **4** and variable speed escalator technology **5** are industry benchmarks in innovation.

**This long-standing commitment to trailblazing technology that safely moves more people with less energy is one we share with Solar Impulse.**

Bertrand Piccard

André Borschberg

## Teamwork

Solar Impulse pilots Bertrand Piccard and André Borschberg are supported by a world-class team of leading weather scientists, engineers, flight staff, ground crew and partners to make their mission possible.

**Schindler's highly trained technicians are redefining reliability, working 24/7 to help assure that your elevators and escalators are always safe and operating at peak performance.**

## Route optimization

Whether flying around the world or taking the elevator to your office or apartment, efficiency is the name of the game!

Schindler pioneered destination-dispatching technology and is the only manufacturer with a third-generation system (PORT Technology), using advanced algorithms to streamline elevator service by more than 30% and provide a seamless user experience.
