

POST-CREMATATION MATERIALS REFINING

RECYCLING NON-ORGANIC WASTE IS THE RIGHT THING TO DO FOR BUSINESS, COMMUNITY, AND THE ENVIRONMENT

Heavy metals found in post-cremation materials could potentially leach into the ground and cause harm to the water supply and damage to the environment.

According to EPA Title 40, the crematory owner is now responsible for the ethical, legal, and environmentally safe disposal of this type of waste.

P&C Environmental is an EPA compliant refinery that is qualified to easily handle this form of material.

WE SPECIALIZE IN HANDLING POST-CREMATATION REMAINS IN A SAFE, LEGAL AND ETHICALLY SOUND MANNER.

USE OUR EXPERTISE TO HELP YOUR BUSINESS

Our facility specializes in handling post-cremation remains in a safe, legal and ethically sound manner as suggested by the Cremation Association of North America (CANA) and the International Cemetery, Cremation & Funeral Association (ICCFA).

We offer non-profit and cost recovery solutions.

ENVIRONMENTAL RECYCLING- WE MAKE IT AS EASY AS 1,2,3

We make it easy to recycle non-organic waste for EPA Title 40 guidelines.

- We supply complimentary containers from 16 ounce small jars up to 55 gallon drums
- Free shipping and insurance
- A special incentive is given to those who choose to sort their recyclables

FINANCIAL STABILITY YIELDS LONG-TERM SUCCESS

With 100 years in business, the P&C way is disciplined, honest, consistent, and reputable.

- Debt-free for over 50 years
- On-going investment in the best equipment, technology and knowledge
- Variety of return options available
