## Dual-Light<sup>™</sup> Flashlight w/ Dual Magnets - Rechargeable

Flashlight

Floodlight

Dual-Light

The rechargeable Dual-Light<sup>™</sup> Flashlight w/ Dual Magnets use a CREE<sup>®</sup> LED rated at 250 lumens paired with a high-efficiency deep parabolic reflector, creating a flashlight beam with an effective range of 213 meters (over 698 feet). Additionally, built into the handle is a 140 lumen floodlight. Unlike the flashlight beam, the light coming out of the floodlight does not have a reflector so the light spreads out in a wide, even, unfocused pattern of light...perfect for lighting up things that are close. The waterproof design, in combination with an impact and chemical resistant engineered polymer housing, make this one tough light, one of the best values around. Additionally, the integrated magnets located in the base of the handle and pocket clip, provide for almost limitless hands-free usage.

The flashlight is actuated by means of the top body switch providing both momentary and constant-on functionality. The floodlight is operated using the bottom button. Additionally, both lights can be turned on at the same time for even more versatile lighting options. Now you have a light for distance and one for close up work. Power comes from a pair of integrated Li-ion batteries.
