## AUTOMATED TABLET PACKAGER

- Scalable machine grows as your business needs dictate – 64, 128, 192, 256, 320 in one cabinet size, two add-on units to expand to 400 and 480 canisters

- Dual tray system allows pre-staging of non-canistered medications for continuous dispensing

- 4 pouch sizes allow more flexibility in providing a solution to any patient population

- State-of-the-art printing on pouches: various font sizes and styles, logos and icons for visual recognition and pharmacy branding, extended barcodes including 2D and Linear

- User-calibrated canister system & ½-tab dispensing

- Self-correcting motor bases reduce jamming, and false empties

Configurable for
64-480 canisters

INNOVATIVE SOFTWARE

- Drag & drop design for quick label creation

- New Label Manager provides preview function before printing

- "Pause" feature for interruption to run a small batch, then return and continue dispensing large batch

- Color printing option for pass time providing ease of recognition for patients and caregivers

- Skip medication function provides safe and quick handling of back-ordered medications

- Continuous improvement reporting for inventory management and usage

- Biometric scanning for user login

Supports images

Supports many barcode variations
