## On Demand K12 Gateway

Student Relationship Management (SRM) for K12

Intelligent Document Distributor™ transforming risky warehouses and filled file cabinets to living, breathing, on demand and accessible records.

Advanced Security Controller™ automating Access and Permission management roles based on record type. Automated student record processing leaving little room for human error.

Policy and Compliance Monitor™ User Configurable Retention, Archiving and Reporting schedules. Establish Retention and Archiving schedules from 1 to more than 100 years at the click of a button.

ParentShare Engagement Module™ Automatically delivering and archiving student communications including report cards and progress reports thereby eliminating the manual processes used today. ParentShare increases parent/student/district interaction all the while saving valuable costs and resources.

Complete Electronic Cumulative Folder creation from Pre-K to College with simple district to district or district to college transfer for the complete student folder or transcript requests.

Automate your FERPA compliance strategy when it comes to documents and communication. Simply configure On Demand K12 Gateway with your district FERPA policies and you are done. Parents can easily view FERPA “educational records” and those documents and communications that are not deemed FERPA “educational records” remain hidden from the parent view.
