Atmosera Becomes the Newest Microsoft Cloud OS Network Partner to Deploy Hybrid Microsoft Clouds

Atmosera engineers, deploys and operates clouds based on the Microsoft Cloud Platform

News Summary

PORTLAND, Ore. - - July 28, 2015 - - Atmosera announced it is now a part of the Microsoft Cloud OS Network (COSN) and complies with its rigorous criteria for excellence and expertise surrounding Microsoft Cloud Platform and Azure deployments. The Cloud OS Network is a worldwide group of select service providers that offers technically validated, hybrid cloud and Azure-enabled solutions. Atmosera hybrid cloud solutions can now be based on the Microsoft Cloud Platform and are engineered using Windows Server 2012 R2 with Hyper-V, System Center 2012 R2, and Windows Azure Pack. Environments support both Windows and Linux-based operating systems. Every solution includes a unified view of a client's entire infrastructure, consolidated monitoring, security management, governance and simplified billing. By leveraging a single technology stack with built-in capabilities, clients can reduce the need for additional third party applications and realize financial savings.

Atmosera brings years of engineering and deployment experience to accelerate successful Microsoft deployments. Cloud OS Network compliance certifies Atmosera's proficiency and strict adherence to best practices. Atmosera takes advantage of Microsoft's technology and deploys it in a secure, dedicated environment with 24x7x365 live support. Clients can also take advantage of other Atmosera advanced services including disaster recovery, end-to-end security management, compliant environments for HIPAA/HITECH and PCI DSS, SQL Server application management, Office 365 licenses, and remote hands capabilities anywhere in the world.

Key Facts

- Atmosera has over 20 years of experience delivering a consistent and outstanding client experience.
- Atmosera is now a Cloud OS Network compliant service provider.

- Atmosera can deploy Microsoft Cloud Platforms in Atmosera operated data centers or on-site in a client's own facilities.
