ABOUT ONPOINT SPORTS

OnPoint Sports is the new standard in real-time sports data delivery, offering virtually every traceable sports statistic for players and teams. The perfect companion for casual sports enthusiasts, superfans and fantasy players, all the data you need is now in one place.

Subscribe to the teams and players you care about and receive push notifications within 3-5 seconds of the event taking place in real-time. OnPoint Sports was founded by three graduates of the McMaster University Computer Science program who set out to create a solution to the multitude of unsatisfactory options in the sports data category.

FEATURES

- Over 1,000 statistics and data points
- Set alerts for games and scores
- Player pages with hundreds of statistics
- Live rosters
- Dynamically generate statistics comparison charts
- Twitter feeds showing what's trending for teams and players
- Live detailed play-by-play plus field animations
- Game-time statistics
- Live league standings
- Live game highlights
- Historical game, play-by-play, player, and team statistics dating back to 2012

THE TEAM

Elisha Ferrara, Chief Executive Officer

Elisha is a graduate of the Computer Science program at McMaster University. He has held software developer positions in semiconductors, aerospace/defense and automation.

Vitaly Kondratiev, Chief Creative Officer

Vitaly is a graduated from the Computer Science program at McMaster University. He has held software developer positions in semiconductors, utilities, healthcare and education.

Tyler Lyn, Chief Technical Officer

Tyler is a graduate of the Computer Science program at McMaster University. He has held software developer positions in semiconductors, geomatics and utilities.

ORIGIN STORY

Elisha, Vitaly and Tyler met as students at McMaster and became friends in their first year. They worked on projects together throughtout their time in school and realized that they made a good team. After starting their careers, they eventually worked together in the field of semiconductors. The team came up with the idea for OnPoint after becoming frustrated with the lack of availability of advanced sports statistics all in one place. Avid football fans, they were members in fantasy leagues looking for a way to easily analyze data for their drafts. When there was nothing that met their needs, they knew that OnPoint would help not only themselves but the millions of other sports fans looking for the same thing. They quit their jobs and while working full-time on development, started a round in search of seed funding which they closed in 60 days.
