

## Get more with TDS

### More Fleets

With a staggering database containing over 1.9 million fleet records, TDS has more fleets than any other search and monitoring service in the transportation industry.

### More Data

You will gain immediate live access to every USDOT number in United States, Canada and Mexico. You can search, sort and export criteria, and even customize qualification and alert settings to immediately notify you when your fleets have any safety or insurance changes.

### More Efficient

From verifying safety ratings, operating authority and CSA BASICS to viewing and managing fleet insurance certificates, our easy-to-use service helps you make timely and informed decisions.

*“Transportation Data Source has truly become an indispensable tool for our team. We work in many different aspects of the transportation sector and TDS gives us a way to quickly connect with our customers, saving valuable time and money. We are able to pull detailed lists of potential fleet customers and filter them by location, size or segment and easily import them into our CRM for future contact. I would recommend TDS to any company in the transportation business that would benefit from having clear, concise and accurate information on any fleet that they want to work with.”*

# TDS

Transportation Data Source

YOUR MOST COMPREHENSIVE  
ACCURATE SOURCE FOR  
FLEET INFORMATION

SEARCH

SORT

EXPORT

Largest database of motor carriers  
in the transportation industry.

Transportation Data Source provides an easy and efficient system for you to qualify and monitor fleets, access CSA BASICS, safety ratings, insurance information and certifications, create due diligence reports, export CSV files, access API tools and more.

## Why TDS?

Our easy-to-use comprehensive search tool allows you to look for contact and demographic information on individual fleet operations across North America. With 24-hour access to the most up-to-date information available, you can easily customize your selections to fit your company's needs.

### Real-Time Information

We continually monitor and update our information from a wide variety of industry data sources.

### Customizable

Easy to access, search and export the information exactly how you need it for your business.

### All-inclusive

Whether you need to monitor carriers, build qualified carrier databases or prospect, you can do it all right here – regardless the type of fleet!

### Training & Support

Before, during and after – we are here to help put the data to work for you. Yes, it's all free with your subscription!

**With the right data, informed decisions come easy.**

One place. One database. One source.

## Services we offer

**Fleet Search** enables you to search and view the entire database for information such as fleet size and locations with street view maps, makes and models of equipment, commodities carried, SmartWay, CARB TRU registered, CSA BASICS and more.

**Advanced Search** allows you to search FMCSA authority and insurance details.

**Transportation Leads List** allows you to acquire custom leads based on your needs.

**VIN Search** including roadside inspection details.

**Fleet Monitoring** informs you of safety violations, allowing you to monitor your fleets through daily notifications of changes to safety information, CSA BASICS and insurance based upon your preferences. API tools are also available.

**Due Diligence Reports** allow you to easily create PDFs with fleet information.

### Custom Insurance Certificates

TDS will take care of collecting, managing and the renewal process on each carrier that you request.

**Cargo Insurance Certificates** are easily accessible to view or download including the ability to request carrier certificates that are not in our library.

**CSV Export** allows you to easily download and import into existing CRMs.

**API Tools** allow access to real time fleet information within your current TMS.

Identify motor carriers in specified lanes by equipment types (van, reefer, flatbed, etc.). Then, qualify them based on meeting custom standards for insurance coverage, CSA BASICS, Safety Ratings, roadside inspection violations and more.

### A TDS exclusive that enables you to:

- Remove potential risks
- Increase efficiency
- Improve profitability
- Proactively manage capacity
- Target sales and marketing efforts
- Identify opportunities
