Dade Moeller's Capabilities

Dade Moeller is adept at defining the risks posed to workers, the public, and the environment, and developing effective solutions. Dade Moeller has successfully managed projects in the functional areas of health physics, radioactive waste management, nuclear safety, Integrated Safety Management, risk assessment and management, programmatic assessment and surveillance, industrial hygiene, environmental protection and compliance, site remediation, and decontamination and decommissioning.

RADIATION PROTECTION

We excel in nuclear and radiation safety, naturally occurring radioactive material (NORM), licensing, audits, decontamination and decommissioning (D&D), radioactive material handling, and healthcare.

NORM

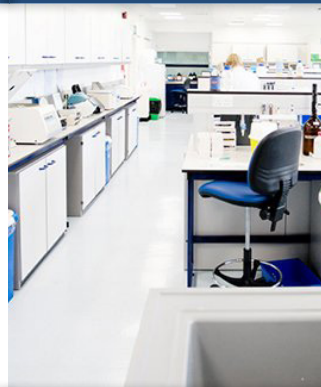

We assist facilities and sites that deal with NORM and TENORM issues. We identify the presence and quantity of NORM, train managers and staff, evaluate worker safety, and ensure the safe handling or disposal of NORM.

INDUSTRIAL HYGIENE

We help safeguard some of the most complex work sites in the world through our industrial hygiene (IH) programs, field services, audits, and accident investigations.

LABORATORY CONSULTING

We help labs prepare for external audits and support National Environmental Laboratory Accreditation Program (NELAP) and International Organization for Standardization (ISO) Accrediting Bodies quality program development.

ENVIRONMENTAL SERVICES

We bring a full range of capabilities to environmental projects, from permits, licenses, and National Environmental Policy Act (NEPA) analyses, to systematic planning, data validation, and sample management.

TRAINING

The Dade Moeller Training Academy has long been recognized as one of the foremost providers of education and training on a complete range of radiological and occupational safety topics.
