

Managed Failover Connectivity Protect your business from the unexpected

Unexpected network downtime can cost your business in many ways -- from lost sales and productivity to frustrated customers who may never return. Whether the downtime is caused by an unusual event like a hurricane, tornado, flood or fire, or by a more common occurrence like a blackout, human error or a computer glitch, getting your network back up and running quickly can help you reduce the negative impacts of unforeseen events.

Help ensure you're prepared for the unexpected with AireSpring's Managed Failover Connectivity, which provides a separate, redundant network connection in the event your primary connection fails. While the AireSpring Network already includes multiple levels of redundancy to ensure high availability for our Cloud and Voice Network or private MPLS Networks, Managed Failover offers an additional level of high availability connectivity at your location. And, AireSpring will work with you to ensure you have the level of Managed Failover that best fits your mission-critical business requirements.

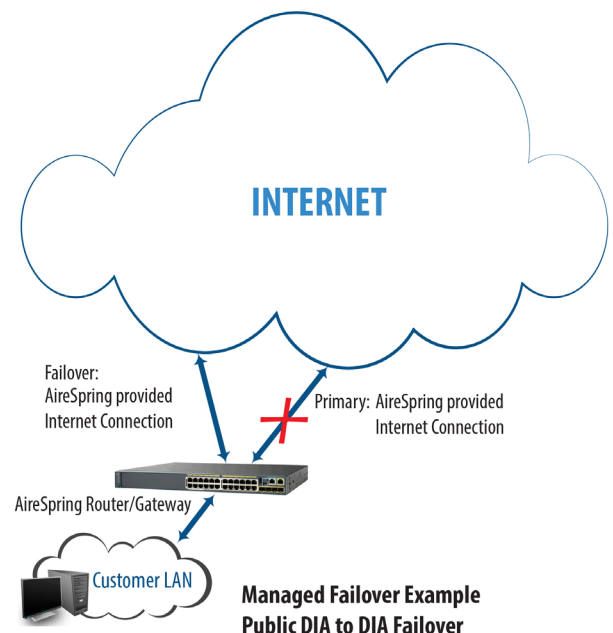

CONNECTIVITY OPTIONS

- **Failover to Public Internet:** Use a public Dedicated Internet connection provided by AireSpring (or another vendor) as the failover from an AireSpring-provided Dedicated Internet Access (DIA) or Managed Connectivity connection.
- **Failover to AireSpring Managed Connectivity:** Use another AireSpring Managed connection as the failover from an existing AireSpring Managed connection.
- **Failover to Private AireSpring MPLS Mesh™:** Use an AireSpring-provided MPLS connection as the failover from an existing AireSpring-provided MPLS connection.
- **Failover to Public Internet with IP sec VPN:** Use AireSpring's IP VPN Remote Access Service, together with a public Dedicated Internet connection provided by AireSpring (or another vendor) as the failover from an existing AireSpring-provided MPLS Connection.
- **Dual Hot Standby Router Protocol (HSRP) Router:** For ultimate peace of mind, add an extra level of protection by installing a redundant router.

FEATURES

- AireSpring's Managed Failover Connectivity will automatically detect access issues with the primary connection and route traffic over the redundant connection until service is restored to the primary connection.
- AireSpring professionally configures the router, then manages and monitors your network with the help of our 24/7 AireNMS network monitoring service.
- AireSpring Voice and MPLS services can also be configured to automatically failover.
- Diversified connectivity options are available using a wide range of underlying vendors: Ethernet (copper and fiber), EOC, TDM, Cable, DSL and Wireless.

Help minimize potential network disruptions with AireSpring Managed Failover Connectivity.

THE AIRESPRING ADVANTAGE™

Fully Managed Network with QoS

Our fully managed, owned and operated IP network with end-to-end QoS provides exceptional voice quality. Multi-carrier and multi-network redundancy delivers maximum security and uptime (available with AireSpring Managed Connectivity).

Free On-Premises Enterprise-Grade Router/Gateway

We provide a fully managed, enterprise-grade router/gateway to manage VoIP and Data traffic, which comes standard with AireSpring Managed Connectivity services (additional backup routers available for a fee).

Free 24/7 Proactive WAN Network Monitoring Service

Our Managed Failover Connectivity services include free 24/7 professional monitoring with the AireNMS network monitoring service. Our NOC proactively monitors your network to pinpoint and fix potential problems before they affect your business (available with AireSpring Managed Connectivity).

Reliable and Diversified Network

AireSpring's geo-redundant network provides true network diversity and supports disaster recovery options, allowing you to ensure business continuity.

Largest Available Coverage

From Somerset, CA to Madill, OK to Moravian Falls, NC to New York City, we cover more locations than anyone else on our network with the largest combined North American MPLS footprint.

Online Access via our AireCare™ Customer Portal

Our advanced online billing reporting portal provides 24/7 access to your billing and service details.

Eliminate Finger Pointing Between Providers

All services are delivered by a single vendor on a fully managed network, allowing you to avoid the finger pointing that can occur when multiple vendors are involved.

Escalation List Up to Our CEO

We stand behind our services 100 percent! We're so committed to ensuring complete satisfaction that we provide all our customers with an escalation list giving you access all the way up to our CEO.

Personalized Service

AireSpring delivers outstanding customer service, featuring one bill and a single point of contact for all your service needs.

AireSpring has received numerous industry awards for "Product of the Year," "Best Telecom Deal," "Members Choice Top Reseller," "Best in Show," and "Top Channel Program."
