

mFrontiers

Connecting People, Devices, and Data

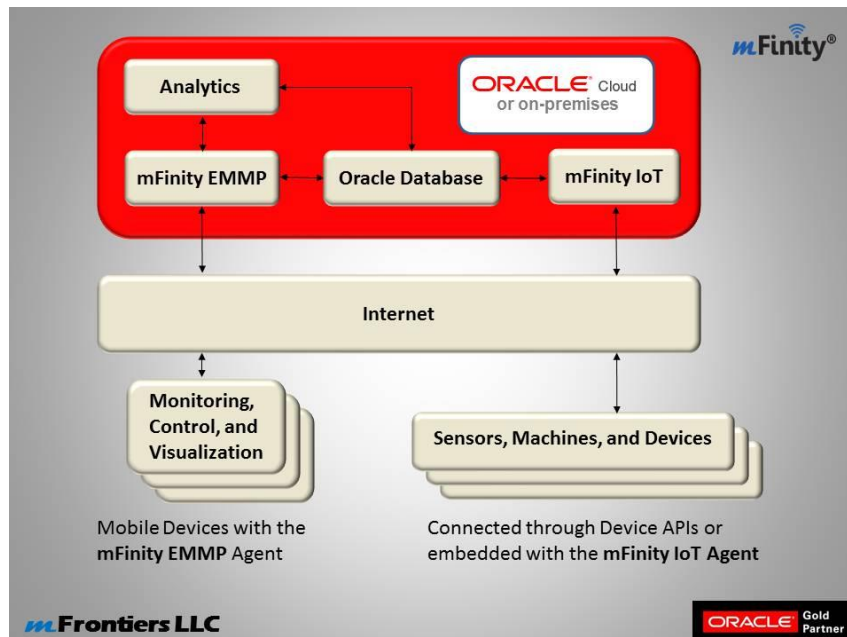

The **mFinity**[®] platform delivers Oracle-based solutions for connecting people, devices, and data. **mFinity** is available for Enterprise Mobility Management and the Internet of Things both in the Oracle Cloud and for on-premises implementation.

mFinity EMMP

An Enterprise Mobility Management Platform that provides mobile device management (MDM), mobile application management (MAM), and a framework for single source code development of applications for deployment across multiple mobile device types and operating systems (BYOD).

mFinity IoT

A connectivity platform for the Internet of Things that uses Oracle Cloud Services to ensure low latency, and high performance, scalability, and security, for the monitoring, control, data collection, and data analysis of a global network of sensors, devices, and equipment.
