## ABOUT THE LIBERTY TRIKE

The Liberty Trike is the ultimate mobility solution empowering you to leave your car at home, get around effortlessly when needed, and be more active outdoors! This a one-of-a-kind electric tricycle designed for everyone on the go. With an industrial frame made in the USA and patent-pending hinge allowing the trike to fold or separate, it's easy to take anywhere.

## KEY FEATURES:

- It can carry heavy loads, up to 300 pounds, up most inclines with ease
- The lithium battery pack has a range of up to 24 miles
- Top electric-assisted speed is 11.5 MPH
- Wide 16" x 2.5" tires provide stability and comfort
- The narrow 25" rear allows you to navigate doorways with ease
- A 360 degree turning radius allows for maneuvering in tight spots
- It can fold or separate with the patent pending hinge, making it ultraportable

## **WHO IS IT FOR? WHAT SOLUTION DOES IT PROVIDE?**

The Liberty Trike is for everyone who wants to ride more often, ride stable and ride with assistance and stability. It can be used in hundreds of scenarios to improve your lifestyle, like at the beach, in big cities, in parks, around the house and anywhere else!

The solution the Liberty Trike provides is the ability to be active or to move effortlessly using the electric drive system to be outside more, doing more, moving more. As an active mobility solution the Liberty Trike gives you the option to get some physical activity when you want it. This is one of the biggest benefits of the Liberty Trike when compared to a conventional mobility scooter.

## **KEY TECHNICAL SPECIFICATIONS:**

Range: 18-24 Miles per charge  
Watts: 750w  
Weight: 70 Pounds (approx. 35lbs per half)  
Top Speed: 11.5 MPH E-Assisted  
Charge Time: 3.5 Hours  
Battery Capacity: 10 Ah (Amp Hours)  
Battery Voltage: 36 Volts  
Battery Chemistry: Lithium (specifically LiFePO<sub>4</sub>)

## **MOST FREQUENTLY ASKED QUESTIONS:**

### **How much does it cost?**

The MSRP of the Liberty Trike will be \$1998 USD. The earliest supporters here on Indiegogo are being offered discounts up to 40% (SAVE \$799 and pay \$1199).

**How fast does it go?** The Liberty Trike is governed at a top speed of 11.5MPH. Riders may pedal faster on their own without any restrictions. The motor will help up to 11.5MPH max and will not have any resistance to natural pedal power above that top assisted speed.

**How far does it go?** The range for the Liberty Trike is 18-30 miles with the supplied 36v10ah LiFePO battery pack. The final range per full charge will ultimately depend on the total load (weight of rider and cargo), input and terrain.

**How long does it take to recharge?** The charge time for the supplied battery pack with 2.5amp charger is about 3.5hrs from empty to full. Like a cell phone, the battery may be charged at any time and the charge time will depend on the present level of charge in the battery.

**Do I need a driver's license?** No, the Liberty Trike system is well under the Federal regulations for a motorized vehicle and is as street legal as any conventional tricycle in most if not all states. Please check with your local DMV or regulatory authority if you are unsure.

**Is the Liberty Trike covered by Medicaid?** The Liberty Trike is not a medical device and therefore is not covered by Medicaid.

**Jason Kraft | Founder & CEO, Electric Bike Technologies**

Jason founded Electric Bike Technologies in 2008, since then the company has grown exponentially with its line of electric bike and trike conversion systems. Jason is well-known within the electric bike industry and was appointed this year to manage the Electric Bike Industry group on LinkedIn with close to 4000 members. Jason is the face of the company and manages a team of dedicated employees that have proven themselves worthy of bringing products like the Liberty Trike to market.

*"Under-promise and Over-Deliver is our mantra in everything we do and that's the plan for the Liberty Trike."*
