Smart Bottle

Real Time Water Consumption Tracking

Our goal was to create the most useful smart bottle yet that can maintain water temperature and satisfy all kinds of water drinking habits. Therefore, we disused all the existing water consumption monitoring techniques and began to develop new ones. After significant research and testing, we developed the stunning Air-Elastic water consumption monitoring technology.

Air-Elastic

Air-Elastic technology stands apart from other water consumption measurement techniques because it adds no extra equipment to the outside of the bottle. By applying aerophysics, Air-Elastic monitors water volume/consumption by measuring the amount of air in the bottle, all without touching the water.

Light, Smart and Easy

We've completely integrated all of Seed's smart technologies into the simple act of drinking, so you can enjoy all of Seed's features while using Seed just like an ordinary bottle.

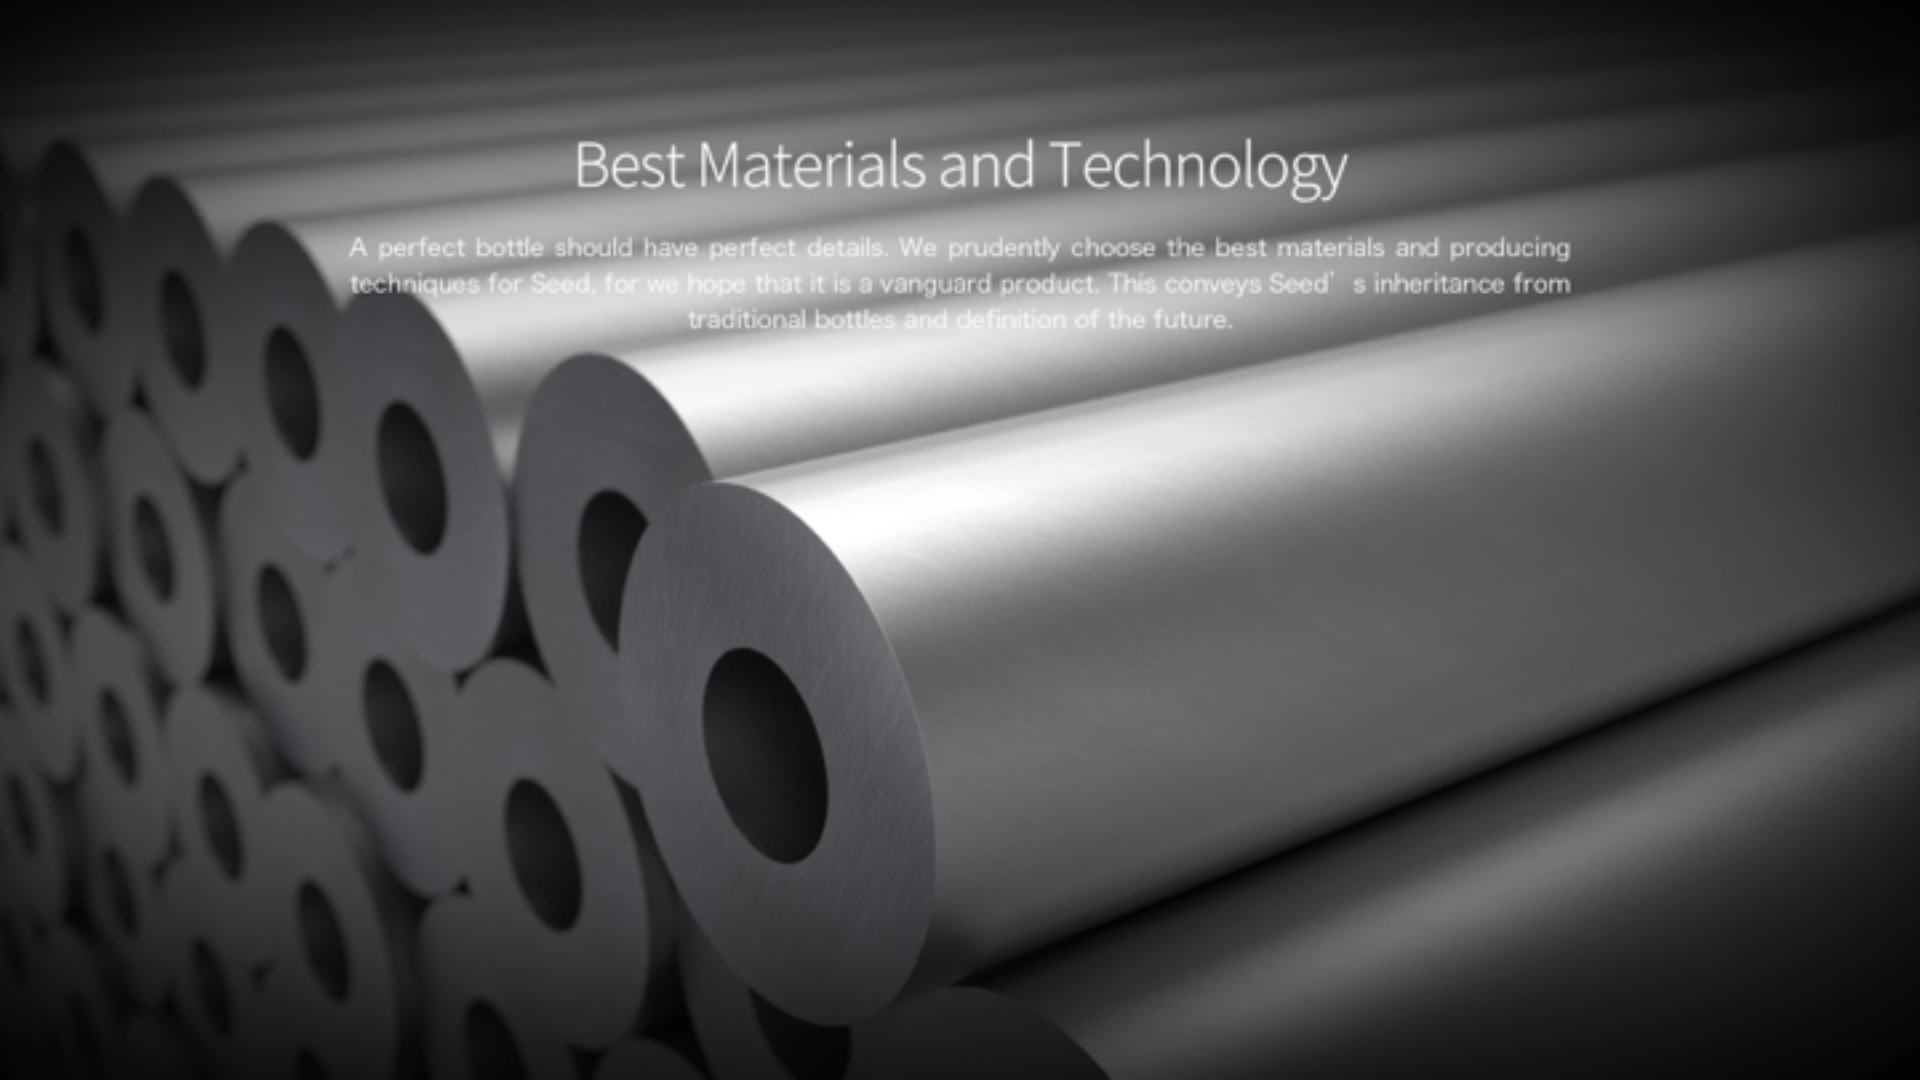

Closing the cap,
quickly check daily water consumption

Open the bottle,
water temperature display

Touch the screen of the cap,
record high-temperature and stale water

Best Materials and Technology

A perfect bottle should have perfect details. We prudently choose the best materials and producing techniques for Seed, for we hope that it is a vanguard product. This conveys Seed's inheritance from traditional bottles and definition of the future.

Japan-made 304 Stainless Steel

Coppered Interlayer

Nitrogen Welding

Super Temperature Preserving Property

Thermal insulation

$\geq 85^{\circ}\text{C}$

1h

$\geq 70^{\circ}\text{C}$

6h

$\geq 50^{\circ}\text{C}$

12h

$\geq 35^{\circ}\text{C}$

24h

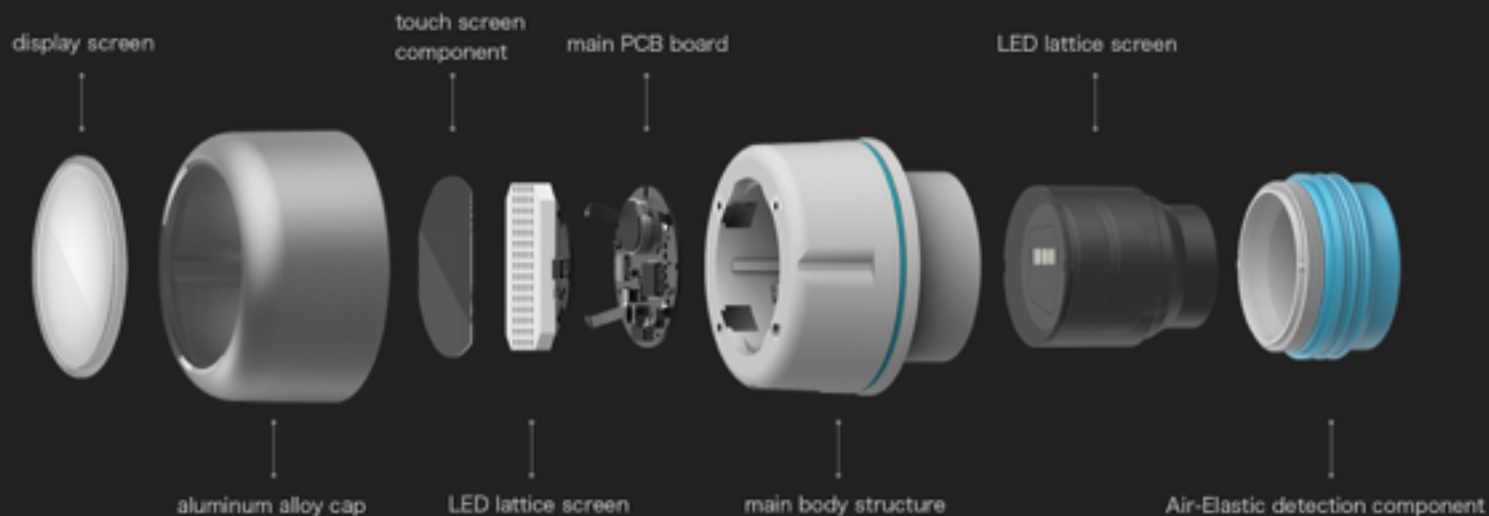

Cold insulation

$\leq 9^{\circ}\text{C}$

Excelling the Classic as an Inheritor

Seed' s design philosophy follows that of the classic bottle, preserving the lines and curves with which you are familiar, and creating a comfortable grip. However, we' ve revolutionized the structural elements of the bottle by fully adopting cutting edge Air-Elastic technology. Seed' s every detail is innovative, yet comfortably familiar.

Broadening Your Life

Seed can do more than just record water consumption—we've not only perfected the Seed app, but also opened a data interface providing unlimited opportunities to use your water consumption data with all kinds of third party products.

Compatible with Apple HealthKit

Seed is fully compatible with Apple HealthKit, letting you use your water consumption data in a unified health platform.

* Requires iPhone, iOS 9.0 and above.
