What is Otus?

The Otus Student Performance Platform, designed specifically for K-12 school systems, is the first system that integrates student learning data from 3rd party assessment and content providers (i.e. NWEA, AimsWeb, Khan Academy) with real-time, in classroom data, captured through Otus' award winning learning management system and student behavior and engagement tracking tools.

Otus' powerful analytics display learning data in easy to understand visuals enabling teachers to maximize student learning potential and demonstrate student growth.

These analytics are also available to administrators so that they can make the best decisions for their schools and demonstrate how their instructional decisions are impacting students.

Best Practices Supported by Otus
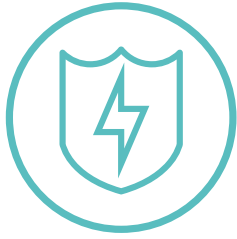

Differentiated Instruction

RTI Programs

Individualized Learning Plans

Flipped Classrooms

Project-based Learning
