

## Safe Water. For All.

Kohler has a long history of product design and manufacturing that seamlessly blends form and function. Now, we are bringing our expertise to WASH (Water, Sanitation and Hygiene) initiatives worldwide to help solve health and hygiene problems, such as limited access to safe drinking water.

In our research into providing safe drinking water to all, we realized there was a tremendous opportunity to improve both the performance and design of the water filters currently available in developing nations. So we challenged our industrial designers and engineers to create a better filter. We believe they did just that with the KOHLER Clarity system.

## KOHLER Clarity is about solving a problem.

KOHLER Clarity is incredibly simple to use and maintain. Backed by Kohler's commitment to quality, it's made with Kohler's philosophy of fusing design and technology. And, most important, it will provide safe drinking water for people all over the planet.

- **Filters approximately 40 liters per day**  
- enough for a small family
- **Filters over 2 liters per hour**
- **23 liters total capacity**  
(11 L dirty, 12 L clean with safe storage)
- **Easy to assemble and clean**
- **Nestable for shipping as individual filters or in bulk**

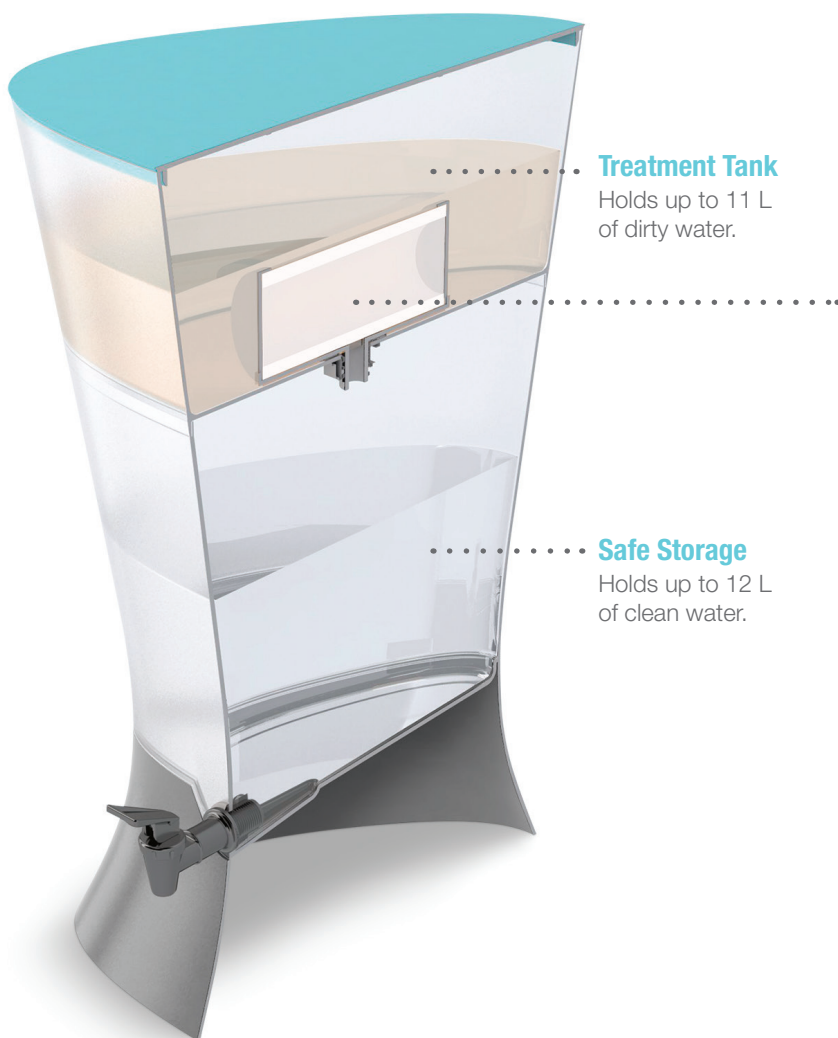

## Bringing safe water to the world one glass at a time.

We have leveraged our means, materials and expertise to design and build a better water filtration system. But we need your help in getting them to the people who need safe drinking water the most. Together, we can help empower people to take water treatment into their own hands—bringing health, happiness and hope to everyone through the fundamental force of water.

“Business success doesn’t matter much if we can’t say we left the world a better place than we found it.”

**-David Kohler**  
President and CEO

### KOHLER Clarity™ Filter Cartridge Specifications

- Estimated life: up to 1 year of typical use
- Removes pathogens and turbidity to meet WHO (World Health Organization) interim-level requirements
- Made with silver for additional anti-microbial properties
- Available as a service part

Dimensions (L x W x H)  
358.65 x 347.98 x 554.23 mm  
14.12" x 13.70" x 21.82"
