## PRESERVING THE PAST

– whether it’s centuries or hours old – has to be flawless. Since 1980, The Crowley Company has been a major contributor to the digital document, micrographics and record reformatting industries. With manufacturing, distribution, imaging and technical support divisions, The Crowley Company provides the most complete range of quality solutions available for archival preservation, digitization and microfilm processing needs.

*"Crowley was able to offer us technology, expertise, experience and reasonable pricing. The staff was easy to work with, which was essential to the success of our project."*

*-Fran O'Donnell, Andover-Harvard Theological Library*

## SCANNERS & SOFTWARE

Creating and maintaining archive records requires equipment that is precise, efficient and reliable. For that reason, Crowley manufactures and distributes only the finest capture equipment and software, having consistently proven that quality always provides the best value and return on investment.

*"From a products standpoint, The Crowley Company offers best of breed products that cover the front-end capture efforts for standard/oversize documents, large format documents, books, microfilm, microfiche and aperture cards..."*

-DPS Magazine

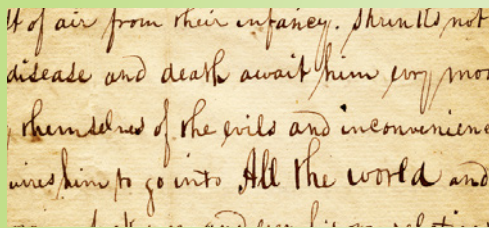

## IMAGING SERVICES

For those imaging projects that require professional expertise or high-volume capacity, Crowley Imaging can address archive and records management projects in-house or on-site as budget, material condition and security requirements allow.

Since 1986, Crowley Imaging has digitized billions of images and records converted from books, paper, micrographic media (film, fiche, aperture card), photographic media and more. A team of professionals offers in-depth experience from across the spectrum of micrographics and digitization.

## SERVICES INCLUDE:

**Archival preservation scanning**  
(fragile, loose or bound materials)

(Library of Congress, Dorothea Lange)

**Graphic arts scanning** (photos; slides; films; plates; posters and more)

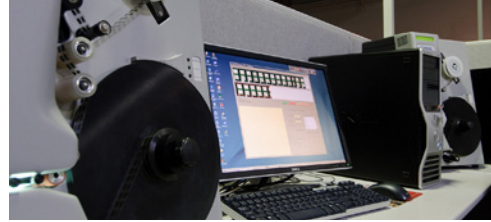

**Paper scanning** (office documents; medical records; forms; maps/drawings and more)

**Micrographics** (microfilming; film duplicating and processing; film generation from digital – 16/35mm in bitonal, grayscale and color)

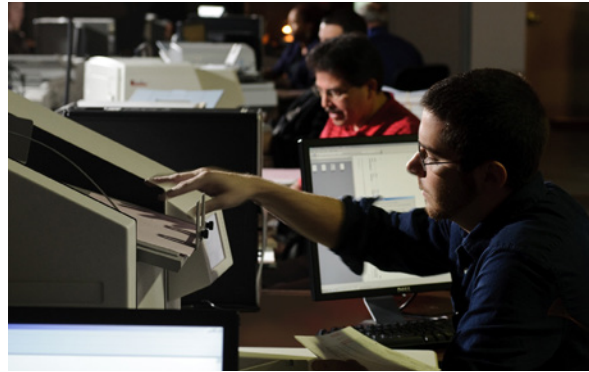

**Bound-book scanning and Large Format** (textbooks; magazines; notebooks; newspapers and more)

**Microform scanning** (microfilm; microfiche; aperture cards and more)

## ADDITIONAL SERVICES AVAILABLE:

Audio/video conversion; keying; mark-up; manual indexing; optical character recognition (OCR); image hosting; digital publishing and more.

*"Crowley has earned the respect of our publishers who feel confident sending their one-of-a-kind materials to the bureau. That confidence is translating into tremendous growth for SmallTownPapers."*

-Paul Jeffko, SmallTownPapers

The Crowley Company technicians are well-versed in multiple brand name and equipment types and provide international support for:

- On-site installation/system training
- Annual/periodic equipment inspections
- Annual/periodic equipment maintenance
- Emergency repair services
- Parts and supplies

*"As owners of a variety of Meikel and Zeuschel scanners, we have found Crowley's equipment to be top-of-the-line and their post-sale service exceptional."*

-Jim Modrall, Vice President, BMI Imaging Systems

Digital and Analog Imaging Systems and Services

## OUR MISSION

The Crowley Company mission is to offer clients a complete-cycle solution to their digital and analog imaging needs utilizing the different facets of the organization. With a uniquely diverse capacity for decision-making and flexibility, we seek to provide a full range of conversion and reformatting solutions to all government, public and private industries and institutions.

## LOCATIONS

The Crowley Company is headquartered in Frederick, Maryland, USA and has manufacturing facilities in California (USA) and Hampshire (UK). Crowley-brand products – Crowley, Extek Microsystems, HF Processors, Mekel Technology and Wicks and Wilson – are distributed through a worldwide reseller network and a strong direct sales team. Conversion services and technical support are provided worldwide.
