Mtell Certified Partner

Deep Domain Expertise for Predictive Analytics and IIoT

Press Release

4Atmos Technologies Announces Strategic Partnership with Mtell

The Partnership Provides Transportation and Industrial Markets with Implementation and Consulting Services for Mtell Software

Waxahachie, TX - January 12, 2016: 4Atmos Technologies LLC, a technical consulting firm for transportation and industrial markets, today announced it has entered into a strategic partnership with Mtell, a leading asset health software solution provider for the Industrial Internet of Things (IIoT).

Mtell deploys a prescriptive maintenance process involving symptoms analysis, health diagnosis, and consideration of alternative corrective actions. The outcome enables maintenance professionals to improve maintenance best practices by servicing equipment promptly and eliminating machine failures.

4Atmos, an Mtell Certified Partner, provides implementation and consulting services for Mtell software solutions. Embedding machine learning data science and combining process and machine sensor data with maintenance activity, Mtell solutions detect subtle, early warning behavioral patterns that indicate impending failure. The partnership leverages 4Atmos' hands-on expertise for rapid project deployment and key follow-on support services to develop best-in-class solutions.

"4Atmos is excited to be a part of this new strategic alliance with Mtell. We've witnessed Mtell clients achieving remarkable successes and saving millions of dollars by avoiding potential failures," said 4Atmost President Mike Jensen. "Mtell's prescriptive analytic technology makes opportunities from the Industrial Internet of Things (IIoT) a reality and is transforming the industry with methods unmatched by its competition."

"This new partnership with 4Atmos advances current Mtell customer achievements and further expands our footprint in transportation and industrial markets," said Paul Rahilly, CEO at Mtell. "4Atmos' industrial experience brought tremendous successes with Mtell Previse and we look forward to this alliance continuing to provide great levels of service to our customers."

About Mtell

Founded in 2006, Mtelligence Corporation (dba. "Mtell") is a privately held company providing software solutions for managing the health of industrial equipment. Creating a world that doesn't break down, Mtell plays an important role in developing the Industrial Internet of Things. In addition to reducing risk to people, safety and the environment, Mtell is a significant contributor to equipment performance and profitability. Solutions are deployed globally in the oil and gas, mining, transportation, pharmaceutical, and wastewater industries. For more information, visit us online at www.mtell.com.

About 4Atmos Technologies

Founded in 2013, 4Atmos stands for "Four Atmospheres" in diving terminology. At 99 feet underwater, only the most experienced divers can go to four atmospheres and beyond. For business, 4Atmos consultants have deep domain experience to help empower organizations to rapidly deploy solutions and business best practices / processes that result in real-world savings and optimized efficiencies. Our customers have realized millions of dollars in hard cost savings, reductions of lost opportunity costs and improved uptime / availability.

4Atmos consultants have worked extensively with Mtell software solutions since 2009 in a variety of industries including: oil & gas, rail & transportation, mining, manufacturing, public sector and pharmaceutical. For more information, visit us online at www.4atmos.com.
