TRANSFORMING HEALTHCARE DELIVERY

Virtual Care Management Platform

The SnapMD *Virtual Care Management (VCM)* telemedicine platform allows providers to extend their reach of care by leveraging secure live video consultations between ambulatory patients and their primary care and specialty care physicians. Our SaaS solution is a robust cloud-based HIPAA and HITECH compliant communications platform developed to enable healthcare providers to directly engage patients remotely in a "virtual care" environment.

Using SnapMD's VCM platform, healthcare providers can conduct scheduled virtual consultations for patients receiving ongoing treatment. Providers can also conduct on-demand consultations to: help reduce avoidable visits in urgent-care or emergency room settings, provide remote medical services such as in-school virtual clinics, and collaborate physician-to-physician. With our VCM technology, healthcare providers have another powerful tool to help them extend their brand, reach-of-care and find efficiencies in personnel utilization while continuing to deliver high quality healthcare services.

- **Private Label = Your Brand**
- **No Competing Provider Network**
- **Scheduled and On-demand Consults**
- **Browser Based Cloud-Software**
- **No Special Hardware Required**
- **API/SDK Library for Systems Integration**

CONNECTED CARE
Virtual Care Management System

The SnapMD *Virtual Care Management (VCM)* platform is a configurable telemedicine solution designed to scale with a growing business and clinical requirements. Integrated with external systems (EMRs, insurance verification, e-Rx, etc.), our technology delivers a powerful tool to healthcare providers that will extend their ability to reach patients and find appropriate efficiencies.

PROVIDER & PATIENT INTERFACES

- ✅ Family & Individual Accounts
- ✅ Patient Profiles
- ✅ Parental Controls
- ✅ Archived Consults
- ✅ Patient Traffic Management
- ✅ Post Encounter Report
- ✅ Secure File Sharing
- ✅ High-definition Video
- ✅ In-consult Chat
- ✅ Mobile Device Compatible
- ✅ Provider-to-Provider Collaboration
- ✅ White Label (Your Brand our Tech)

CORE FUNCTIONS

- ✅ ePrescribing
- ✅ SOAP Note Documentation
- ✅ Provider Collaboration Tools
- ✅ Single Sign-On (SSO)
- ✅ Patient Routing
- ✅ Capacity Management
- ✅ Patient Population Database
- ✅ Reporting Engine
- ✅ Visit Payment Processing

ADMINISTRATION

- ✅ Patient Traffic Management
- ✅ Institution Account
- ✅ Physician, PA or NP Profiles
- ✅ Consult Scheduling
- ✅ Automated Patient Queue
- ✅ Post Consultation Report
- ✅ Reporting and Assessments
- ✅ Administrator Dashboard
- ✅ Data Marts & Analytics Reporting

DATA CENTER

- ✅ HIPAA and HITECH Compliant
- ✅ Quarantined Data Environment
- ✅ Load Balancing Technology
- ✅ Firewall with IPS
- ✅ Geo Location Redundancy

DATA INTERCHANGE

- ✅ Export/Integration to EMR
- ✅ Peripheral Device Integration
- ✅ Insurance Eligibility Verification
- ✅ Rx Data Integration
- ✅ Store and Forward
