Place pads to support laptop and create cooling air flow

flipIT Laptop Safe® is a measure of compliance with HIPAA § 164.304 Physical Safeguards to protect a covered entity's electronic information system from unauthorized intrusion.

Permits laptop screen adjustment within range of 37° to enable neutral head and neck position.

Low profile lid is ergonomically ideal:

- Lower than laptop screen
- Promotes unobstructed sight lines
- Ensures neutral neck and head position
- Perfect for those who wear corrective lenses, especially multi-focal lenses.

flipIT Kits® contain everything you need for easy installation.

Each flipIT Kit® has fully illustrated, complete installation directions, including a precise paper template to use for locating the cut-out and drilling pilot holes lock/latch mechanism.

Anyone can install flipIT® into any work surface with this criteria:

- 5 inches required in front of unit cutout for lock/latch control
- 2.75" required in back of unit for structural integrity.
- Minimum width for multi-user installations: 30 inches
- Clearance distance under surface for operation: 6.5 inches
- Clearance distance over table top: 8 inches
- Recommended desktop thickness: 30mm (1.18 inches)
- Recommended desktop height for use with keyboard: 28 inches
- Optimal table top widths for single workstations:
 - flipIT® 18: 36 inches
 - flipIT® 23: 44 inches

flipIT Laptop Safe[®]
