

Partnership Adds Corvitus Hiring Assessments to Compeat's OnBoard™ Applicant Tracking System

Corvitus' Mobile Responsive Pre-Employment Assessments Available for Restaurants Using Compeat Workforce Solutions

COLORADO SPRINGS, COLORADO—JAN. 26, 2016—Corvitus—a proven industry leader helping companies hire, develop, engage and retain people—and Compeat—a leading provider of the most comprehensive Restaurant Management Software solution available—today announced their partnership. The alliance offers Compeat customers hiring assessments that are tailored for the restaurant industry.

"We are impressed with Compeat's focus on the restaurant industry, state-of-the-art technology, and reputation," stated Marta Erhard, Corvitus CEO. "With our 30 years of experience working in the restaurant industry, this partnership is a natural fit."

Corvitus hiring assessments screen for culture-fit, characteristics, and behaviors that make candidates successful in their roles. In turn, the time to fill a position is shortened and hiring decisions are made easier.

With today's highly mobile workforce, offering mobile responsive assessments is a must. Corvitus and Compeat are proud to provide seamlessly integrated technology solutions that restaurant candidates can access on any device.

Providing a one-stop-shop experience, Compeat customers can easily select and administer assessments, as well as review results all within Compeat's applicant tracking and onboarding software. The assessments are offered for all Front of the House, Back of the House, and Management positions. Customers can select basic or enhanced assessment options. Customized Corvitus assessments can also be delivered through Onboard.

"We are proud to partner with Corvitus. Our core missions are aligned as both our companies are dedicated to meeting the talent management needs of today's restaurant industry," said Dave Douglas, Compeat Vice President of Business Development. "With Corvitus assessments available through Compeat OnBoard, Compeat customers can streamline their hiring processes while creating efficiencies within their restaurants."
