- Integrated GPS (Optional)
- NFC (Optional)

SECURITY

- Integrated Trusted Platform Module
- Kensington Lock Slots Available on Some Models

WARRANTIES

- Three-Year Limited Warranty Standard on Most Models
- Extended Warranty Programs Available.

Vehicle Mounts

A vehicle mount is a must have if you are driving with your computer in the vehicle, and the selection of vehicle mounting systems Group Mobile carries makes it easy to choose the correct mounting solution for your specific needs.

SAFETY

Safety is one of the top reasons to use a computer vehicle mount. Loose objects in vehicles are one of the top causes of automobile accidents. Every year over 130,000 people are hurt by flying objects inside vehicles, not just during an accident but during sudden stops, turns and unexpected maneuvers. Your computer, or your employee's computer, becomes a very dangerous object at unexpected times. The computer itself can be damaged, causing down time and potentially costly repairs.

ERGONOMICS

Ergonomics and ease of use are additional reasons to install a vehicle computer mount. Having the vehicle computer in a comfortable and easy to reach position reduces back and eye strain as well as increases productivity. If you use a mobile printer, it can also be mounted keeping everything safe, within reach, and in a professional looking set up.

Group Mobile offers a wide selection of mounting options to choose from. We carry the top brands, including Gamber-Johnson, RAM, and Havis. There are also computer specific cradles and docking stations available for many computer brands and models. These cradles and docking stations offer custom fit for your computer as well as port replication with some offering antenna pass-through to increase wireless reception. Whether mounting your computer in your car, truck, van or boat, we have the mounting system you need.
