**CENTER FOR VEIN RESTORATION RINGS IN 2016 WITH NEW OPENING IN CROMWELL, CT**

*44<sup>th</sup> Clinic Promises to Uncork Record-Setting Year*

GREENBELT, MD. – Feb. 2, 2016 Center for Vein Restoration (CVR), the nation's largest physician-led vein treatment medical practice, is proud to announce its expansion to Cromwell, CT. CVR's newest location is slated to begin seeing patients in March 2016 and will be located at 136 Berlin Rd. Suite 202, Cromwell, CT, 06416.

CVR names Dr. Jeffrey H. Takahashi as practicing physician at this new location.

"Above all, my hope and mission at Center for Vein Restoration," Dr. Takahashi begins, "is for all of my patients to see me as approachable, compassionate, and trustworthy. I believe that you achieve that type of relationship by treating patients as human beings who may be in need of help or advice and not as a collection of symptoms or physical findings."

The opening of the Cromwell, CT clinic begins an exciting year for CVR as the practice continues its march toward undisputed industry leadership. As such, this new clinic marks the third Center for Vein Restoration location in Connecticut, with the other two located in Stamford and Norwalk.

"Venous insufficiency is a condition that affects more than 30 million Americans and we believe that treating this potentially serious problem is a right, not a privilege," said CVR President and CEO Sanjiv Lakhanpal, MD. "That's why we're proud to expand our practice to serve more patients than ever and bring genuine relief so people can get back to feeling better, living better, and looking better."

**ABOUT JEFFREY H TAKAHASHI, MD**

Dr. Takahashi joins Center for Vein Restoration with 25 years' experience in treating vein disease. He has served as Chief of Interventional Radiology, Senior Attending Radiologist and Director of Quality Assurance with Middlesex Hospital in Middletown, Connecticut. He was also founder and director of Middletown Vein and Aesthetic Center. Dr. Takahashi has also achieved the following:

- Board certified with a medical degree from Georgetown School of Medicine in Washington, DC
- Three-time recipient of Connecticut Magazine's "Top Doc Award"
- Member of the American College of Phlebology, American College of Radiology, Society of Vascular Surgery and Society of Interventional Radiology

#### **ABOUT VENOUS INSUFFICIENCY**

Venous insufficiency, the cause of varicose veins and spider veins, indiscriminately affects between 30–40 million Americans. Numerous factors including age, weight, prolonged sitting or standing, genetics or a history of DVT (blood clots) can increase the risk of developing this all-to-common and often underdiagnosed disorder. Treatment options range from simple lifestyle changes like exercising or taking frequent breaks from prolonged sitting or standing to an array of minimally-invasive, outpatient procedures that close problem veins, redirecting blood flow to healthier ones.

#### **ABOUT CENTER FOR VEIN RESTORATION**

Having performed its first procedure in 2007 under President and CEO Dr. Sanjiv Lakhnarpal, Center for Vein Restoration (CVR) has since become a nationally recognized leader in the treatment of varicose and spider veins. Dedicated to relieving leg pain, treating the vascular cause of severe leg wounds, and eliminating unsightly veins, CVR's minimally-invasive procedures allow patients to look better, feel better, and live better. With 44 locations and counting, they have assembled the most qualified and experienced team of physicians, researchers, and staff to serve patients across Maryland, Virginia, Connecticut, Michigan, New Jersey, New York, Pennsylvania, and Washington, D.C.
