

## Sleep Disorders Affect Millions

Currently, more than 80 sleep disorders affect up to 45% of the population. The three most prevalent of these disorders are responsible for \$478B in annual healthcare costs.

## WHO WE ARE

FusionHealth is the first population sleep health management solution to deliver consistent and effective treatment for sleep problems at scale. Companies facing rising healthcare costs, safety concerns and productivity declines work with FusionHealth to address the central problem of poor sleep health within their employee populations and in return, reduce healthcare claims, decrease fatigue-related errors and improve the performance and engagement of their workforce.

## HOW WE HELP

### REDUCE HEALTHCARE SPEND

- Decrease Claims
- Lower Healthcare Costs
- Reduce Pharmacy Cost

### IMPROVE SAFETY

- Reduce Accidents & Injuries
- Lower Incident Rates
- Decrease Liability

### INCREASE PERFORMANCE

- More Engagement
- Drive Productivity
- Reduce Absenteeism

### PROMOTE WELLBEING

- Improve Health
- Increase Vitality
- Better Quality of Life

## OUR DIFFERENCE

### ACCESS & DELIVERY OF CARE

Associates no longer have to spend countless hours navigating the healthcare system alone. Every participant has continuous access to the best care and devices, and a team of professional sleep coaches are ready to help at every stage of treatment. Medical specialists remain in sync and up-to-date on participant statuses and proactively administer care.

### SCALABILITY

The FusionHealth population sleep health technology platform, KOEO, revolutionizes the way healthcare is delivered at an enterprise level. KOEO allows for thousands of sleep health professionals to work together and deliver value-based, patient-centered care for millions of participants.

### SUCCESS RATES

FusionHealth is disrupting a broken model of self-directed treatment for sleep disorders. Under the current fee-for-service model, approximately 50% of individuals suffering from sleep disorders are successfully treated compared with a reported 96% of FusionHealth participants.

### PERFORMANCE-BASED PRICING

At FusionHealth, we are about driving positive outcomes for our clients and their associates. That is why we believe in charging our corporate clients only for the treatment their associates actually receive.

**“FusionHealth is a managed-care sleep program. A way to keep people from having to navigate through the healthcare system alone. Typical sleep studies are expensive and there is no follow-up. FusionHealth makes sure participants get through their treatment successfully.”**

Diana Morgan, Willis Towers Watson
