Features

- **All-in-One Solution**

Fully integrated and contained in a specially designed box. Easy to install and operate without any technical skill.

- **Smart Installation** Can be placed on the floor directly instead of on the ceiling. Plug and play. No installation required.

- **Portable**

Can be easily transported. Approximate weight 35 lbs. No disassembly required.

- **Wide Angle Camera**

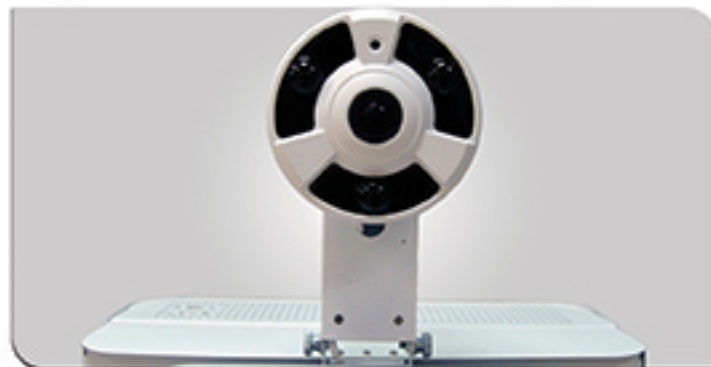

An upgraded wide-angle IR camera captures movements, to ensure seamless interaction.

- **Image Size**

Up to 100 inch interactive area can be produced.

- **High Resolution Templates**

Approximately 170 templates have been developed by professional designers.

3D Templates

There are currently 170 different templates available, many of which are 3D; which adds to the experience. All templates and elements can be customized, such as: background image, audio, video, text, etc. The system comes complete with wireless functionality and is extremely easy to use. Custom effects can be created as well.
