RMT's Remote Robotic Control Functionality

Remote Control for HD Microscope- Based Solutions

Remote Robotic Control Functionality allows users to remotely control their microscope stage and objective levels with real-time auto focusing capabilities. This secure and responsive telepathology system provides pristine, live, dynamic high definition images to all remote participants. Specimen can be safely and securely broadcast for collaborative, concurrent image sharing with dynamic annotations between all parties at locations on-site, across the country, or around the world.

Finally, the robotic solution that you've been waiting for!

- UPGRADABLE
- EXPANDABLE
- EASY TO ENHANCE
- HIGHEST IMAGE QUALITY
- NO PIXELIZATION
