CLOUDPLUS 4

Secure, Scalable, Dependable and Compliant Hosting.

Don't settle for good, when your business deserves the best. With Edge Hosting's CloudPlus™ 4 infrastructure you'll be leading the pack with a public, private or hybrid cloud environment that is high security for data protection, compliant with strict regulations, has the capacity to effortlessly scale and comes bundled with unrivaled U.S. based technical support 24/7/365.

SELECTED FEATURES:

Auto-Scaling – Convenient auto-scaling allows your servers to scale up, down or out quickly based on real time utilization.

Flexible Storage – Select from multiple storage performance tiers and backups options that include file-based backups.

Workload Portability – Spin up any type of server and seamlessly transition it to another computing platform based on your needs between dedicated, physical, public and private cloud.

Reliable & Dependable – 100% no nonsense uptime, so your mission critical business can keep working, even when you aren't.

Multi-Geography – Have peace of mind with multi-geography data storage in our data centers.

Disaster Recovery – Quickly recover your data with snapshot and file level restores.

24/7/365 IT Support – Our U.S. based IT support team is here for you all day and night, no matter where you are.

We don't believe in daytime or nighttime. Just uptime. And that means you get to stay up and sleep more while we work as an extension of your IT team. It's no wonder why Edge Hosting has one of the highest customer retention rates in the industry.
