**CASH MANAGEMENT SOLUTION**

## A Quantum Change in Cash Management

The **SMARTtill™** Solution is a new revolution in cash management, enabling retailers to eradicate cash losses, reduce the cost of cash handling, and improve in-store productivity. The **SMARTtill™** Solution is an innovative cash management system suitable wherever cash is transacted.

The **SMARTtill™** Intelligent Cash Drawer captures, in real-time, all cash activity at its location. This information is collected without affecting transaction time and without interrupting the retail transaction. The **SMARTtill™** Solution may be integrated with current POS equipment.

The **SMARTtill™** Manager software supports each **SMARTtill™** Solution unit deployed in-store by collecting and aggregating cash transaction information and device connectivity health. In-store cash management activities can be performed with confidence and ease, supported by real-time cash on-hand information. The **SMARTtill™** Manager provides vital reports from each **SMARTtill™** including: current and previous cash values allowing managers to effectively manage cash float within the **SMARTtill™** Manager.

**All your cash counted and secured; bill by bill... coin by coin... second by second**
