INTRODUCING

MYPARK AT THE MALL

Become a MyPark Mall Provider and offer a superior shopping experience for your customers, more value for merchants, and more lease revenue for you.

We are MyPark—a new way for customers to park at your Mall, where they want, when they want, without the frustration of driving around aimlessly looking for a parking space or waiting endlessly for the valet to arrive to take or return their car. And no tip required!

Customer Value

MyPark is a mobile app that accesses a parking reservation device, allowing customers to upgrade their parking by getting a space where they want, when they want it. Now customers can quickly and easily secure a space near the store they want to visit with no hassle!

Simply tell the app where and when you would like to park and confirm your reservation. Once you arrive at your reserved space, just tap a button on your iOS or Android device and the unique MyPark reservation unit will lower to give you access. It's that easy!

- **Great for your Merchants**
- **Great for your Customers**
- **Great for your Mall**

Merchant Value

For merchants, the perception of reserved parking and creating a better shopping experience for their customers is of incredible value.

Individual merchants can even reserve and pay for the most convenient spaces for their best customers, delivering recognizable value by providing preferred parking. Merchants simply purchase coupon codes from MyPark and distribute to customers. Their customers will love the ease of parking near the stores they love and merchants will reap the benefit by having customers enter by their storefront.

MyPark in your Mall lets customers know that they can easily get where they need to be without the normal hassles associated with parking. Not only does MyPark enhance your Mall's shopping experience for customers, it gives you additional revenue by leasing spots previously not leased.
