

iPatientCare Recognized for Its “New” Patient Portal Integrated with EHR, Practice Management and Consumer Engagement Suite

iPatientCare unveiled its new set of Patient Engagement Suite products, including the Patient Portal that got recognitions at HIMSS16

Woodbridge, NJ, April 27, 2016 — iPatientCare, a pioneer in cloud-based [ambulatory EHR](#) and Revenue Cycle Management services, released the “new” Patient Portal as part of its comprehensive [Patient Engagement Suite](#) which got tremendous reception and recognition at the recent HIMSS16 at Vegas.

iPatientCare’s new Patient Portal release provides enhanced functionality with the backward compatibility to the previous versions of the Portal and its integration with iPatientCare EHR and [Practice Management System](#). The enhanced Patient Portal ensures Meaningful Use compliance of iPatientCare EHR users, such as, access to Portal, visit and care summaries and secured communication with providers. The new release of Patient Portal has been designed to focus on new generation of consumers who need to be actively engaged in their health and care. The patient suite from iPatientCare empowers healthcare consumers in pro-actively taking control of their own health.

“I started liking it right from the moment I used it the first time. Even though I have not used all its functionalities and even the ones we use has not been used by a majority of our patients (mostly due to our demographics), as a provider New Patient Portal by iPatientCare makes my life easy as it improves communication between me and my patients. It also enhanced the efficiency of my practice because now my patients can request medication refill, Lab results, Critical alerts, view their outstanding amount and they can even pay it online. I strongly believe that better the communication between patients and providers, greater the quality of care. iPatientCare performs the best job in narrowing this communication gap by introducing the New Patient Portal,” said Shoeb Amin, MD - Haverstraw Pediatrics, NY

“We are very happy to present our New Patient Portal with state of the art design and user friendly navigation, integrated with iPatientCare EHR application. We demonstrated our New Patient Portal during HIMSS 2016 which got highly appreciated.”-said Jayanti Patel, Chief Product Architect, iPatientCare Patient Engagement Suite.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company’s unified product suite includes Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and Mobile Point-of-Care Solutions for both Ambulatory and Acute/Sub-acute market segments. iPatientCare has been
