

B-COMM for Workday

Seamless Time Tracking Integration

B-COMM for Workday Time Tracking

Kaba's B-COMM solution is trusted by more than 1,800 customers to safely capture and deliver employee time and labor entries to their ERP systems. Its enterprise-class design facilitates data collection from a variety of devices such as Kaba Time Clocks, Smart Devices, Telephone IVR, and PC/Web Clocks.

Integrate

B-COMM communicates securely and seamlessly using standard Workday web services. Validation data is maintained in the Workday HCM, eliminating the need for redundant data entry. Time and Labor data collected in B-COMM automatically updates the employee's Workday Time Sheet.

Validate

Kaba's innovative data collection solutions are designed to be highly available and provide real time validation. This validation significantly reduces, if not completely eliminates the efforts associated with correcting errors at a later time. Data collection solutions must be available 24 x 7. B-COMM's high availability ensures employees can use the system even during times of planned or unplanned outages.

Communicate

The ability to facilitate business communication is the founding principle of B-COMM. The solution provides more than just a cost effective way to manage time and labor data collection, it provides the best path to communicate with employees.

Validation Data

Employee Data

- Demographic Data
- Badge Number
- Job Profile(s)
- Position(s)

Organization Data

- Cost Centers

Transaction Data

Why you should choose Kaba as your *Workday* solution partner.

Advice

Qualified application consultants work with you and your Workday consultant to develop your individual solution. In addition, there is a highly-motivated team specializing in Workday interfaces, communication and the technology of Kaba terminals at your disposal.

International

We work internationally. This sets us apart from the others. There are over 1800 Kaba installations in the ERP data collection market spread all around the world. In more than 60 countries around the globe satisfied customers are using Kaba. Our branches on location and our partner companies ensure comprehensive customer service.

Software

Kaba B-COMM is constantly advancing with new Workday releases and is therefore kept up to date. In addition to this, with a variety of useful modules, we offer you a modular system of highly flexible software solutions to supplement and optimize your application.

Hardware

Thanks to new technologies, we have integrated the terminal functions and data processing into one innovative overall system. The applications of our new terminals communicate with websites and databases. This means that you can be flexible in terms of the type of your installation (on premises or hosted).

Protection of investment

With the development of new Kaba terminals, the compatibility of one terminal series with the next terminal family always has top priority. This way, Kaba ensures that you can use a mixture of your existing and new Kaba terminals together, thereby protecting your investment for many years to come.

Quality

Kaba develops and produces all components in an ISO 9001 approved quality management system. With modern development methods and procedures, our employees have dedicated themselves to meet your quality requirements without compromise.

What you get from us

Kaba has a proven reputation developing solutions for the top ERP providers. We value the opportunity to partner with Workday.

Kaba's dedication to providing top quality products has stood the test of time for more than 150 years.

The solution, B-COMM, paired with reliable time collection options meets the needs of today's most demanding businesses.

**SOLUTION
PARTNER**
The Workday logo is located within a blue rounded rectangle. It features the word "SOLUTION" in white capital letters at the top, followed by "PARTNER" in white capital letters below it. Below this text is a stylized graphic of two white curved lines that meet in the center, forming a shape reminiscent of a mountain range or a stylized 'W'. Below this graphic, the word "workday" is written in a lowercase, sans-serif font, with a registered trademark symbol (®) at the end.
