

# Introducing Netc Embrace<sup>RF</sup> Asset Tracking

Managing and tracking your assets has never been easier. The Netc Embrace<sup>RF</sup> Asset Tracking System is fully customizable and scalable to meet your specific business requirements. From small businesses to large enterprises, Netc has a solution you can identify with!

Visit [www.NetcRFID.com](http://www.NetcRFID.com) today!

If you would like to test the feasibility and functionality of Netc Embrace<sup>RF</sup> for your business without committing to a large capital investment, our smartphone app is an excellent way to go. Netc Embrace<sup>RF</sup> for Android enables you to take a picture of your asset barcode and send the image to the cloud-based Embrace<sup>RF</sup> database software for decoding and processing. You can add a Bluetooth RFID and barcode scanner to further test the application viability for your business. Plus you can tweet your results to your friends!

Don't take our word for it, try Embrace<sup>RF</sup> for yourself. Scan the QR code with your smartphone for a link to download the Embrace<sup>RF</sup> smartphone app demo.

# Need a large scale asset tracking solution?

Netc Embrace<sup>RF</sup> is fully scalable from small business to large enterprises. RFID-enabled portals and other RFID hardware can be placed at strategic locations to ensure effective asset chain-of-custody tracking throughout your organization. As assets pass through strategic checkpoints the asset location and information is updated and stored on a cloud-based server. Our robust cloud-based reporting function helps to better manage your valuable assets. Discrepancies are recorded and text and email alerts are sent to the appropriate people in your company.

Netc will design and create customized RFID asset tags, including your company logo, to suit your specific business needs.
