

# USER1ST ASSISTING THE VISUALLY IMPAIRED

Cataracts	Low Vision	Total Blindness	Glaucoma
By 2030 37,00,000 affected in US	By 2030 4,500,000 affected in US	By 2030 2,000,000 affected in US	By 2030 4,000,000 in US
			
Cataracts can cause blurred vision and sensitivity to glare.	Macular degeneration causes loss of the central vision needed to see details.	Total blindness is seldom experienced as total blackness.	Glaucoma can cause tunnel vision, reduced night vision, and blurring of central vision advanced cases.
