A CONTINUOUS QUALITY EVOLUTION.

Founded on the principles of exceptional quality management and innovative technology, IQS transforms the way the world's top manufacturers operate. For 28 years, IQS has been delivering market-leading quality management and compliance solutions designed by quality professionals for quality professionals. The result is an enterprise-wide solution that delivers best-in-class data visibility with deep and open integration capabilities, and a team of experts to ensure timely deployment success and fanatical customer support.
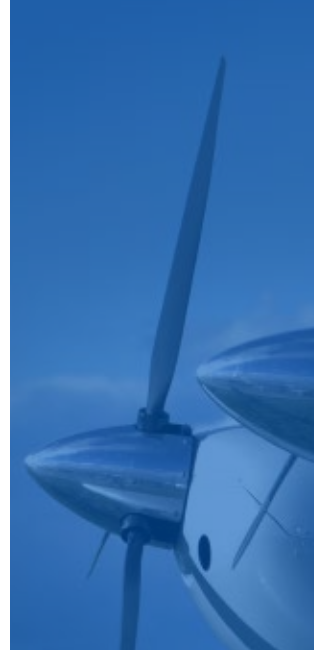

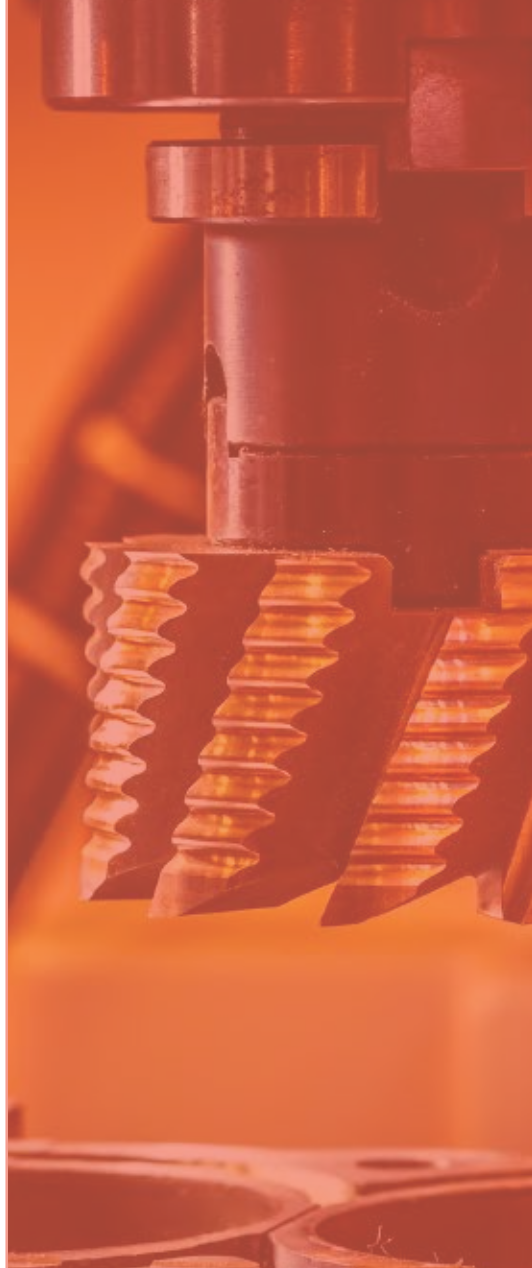

REDUCE RISK & IMPROVE VISIBILITY.

The IQS solution provides a best-practice based framework that drives compliance to regulatory requirements, conformance to quality standards, and accommodates organizational compliance mandates. When implemented, IQS reduces risk, improves visibility and harmonizes key aspects of your business processes aiding in the transformation of quality to a mature, proactive state.

Engineered to elevate the quality management system into a strategic business improvement tool, IQS enterprise software has tightly integrated functionality that addresses every aspect of quality and compliance, including:

- **AUDIT MANAGEMENT**
- **CHANGE MANAGEMENT/ECN**
- **CUSTOMER COMPLAINT TRACKING**
- **DOCUMENT MANAGEMENT**
- **EMPLOYEE TRAINING**
- **EQUIPMENT MAINTENANCE**
- **FMEA/CONTROL PLANS**
- **GAUGE CALIBRATION**
- **INSPECTIONS/SPC**
- **NONCONFORMANCE/CAPA**
- **PPAP/FIRST ARTICLE INSPECTIONS**
- **SUPPLIER PERFORMANCE**

IQS keeps you in step with dynamic compliance requirements (such as ISO 9001, TS 16949, AS 9100, ISO 14001, ISO 13485, and FDA GxP) and helps you measure and reduce the cost of quality.

THE SUPPORT YOU WANT.

The IQS professional services team partners with you from the first day of your deployment through your journey to quality management excellence. With proven industry-specific expertise and a lean and mature implementation methodology, our team has serviced many successful global rollouts for progressive world renowned manufacturers. IQS continues to help companies flexibly and seamlessly scale-up as needs mature and demands increase.

FITTING YOUR NEEDS.

We understand every company faces a unique set of quality management challenges, which is why we designed our solution to adapt to your business.

FLEXIBLE AND INTUITIVE.

Off the shelf, IQS delivers an easy-to-deploy solution built with an intuitive user experience focus. A consistent interface, role-based personalization, and a flexible reports engine with modifiable dashboards let professionals see what's most meaningful to them.

REDUCING THE COST OF QUALITY AT SCALE: DATA VISIBILITY

Proactivity is vital to effective quality management. It requires visibility into quality and compliance at every phase of the product lifecycle. IQS enterprise quality management software acts as your intelligence gateway into global performance, showing you the who, what, where, when, and why of all things quality. Got a nonconformance? Our comprehensive solution lets you dig into what happened, trigger a corrective action, and prevent it at a global scale. Workflows and content sharing notifications streamline your process.

QUALITY AND COMPLIANCE FOR THE ENTERPRISE.

Companies that prioritize cohesive quality have made great strides in reducing costs, winning new business, and driving innovation. IQS works with global clients to cultivate an enterprise-wide quality and compliance hub. Our software enables you to streamline, harmonize, and centralize quality and compliance data and processes. Our team (and solution) support multiple languages worldwide to help with the deployment and ramp-up processes.

QUALITY MANAGEMENT THROUGHOUT THE SUPPLY CHAIN.

We understand closed-loop quality and the importance of getting things right from the start. IQS takes quality and compliance beyond the organization for the mission critical purpose of collaborating and building true partnerships with suppliers. Our supplier performance software helps you automate supplier data collection, maintain a digital traceability record, manage your risk, and drive better performance from your upstream partners.
