

### Smart Vision Lights Camera-to-Light Cables Available for Baumer Cameras

**Muskegon, Mich., May 24, 2016** — Smart Vision Lights, a leading designer and manufacturer of high-brightness LED lights for industrial applications, announced that its camera-to-light (CTL) Grey Series of cables are now available for cameras made by Baumer and other original equipment manufacturers (OEMs).

The CTL Grey Series cable provides a directly wired connection between a single light and the Baumer VeriSens® XC series camera. The CTL series is available for either steady/constant or flash/strobe connections, and the cables are available in lengths of 0.3 meters and 2 meters, with other lengths available by request.

The CTL Grey Series cables are compatible with Smart Vision Lights' OverDrive lights, which supply the necessary energy to run the strobe/flash features of the Baumer VeriSens® XC camera.

Both CTL cables offer a standard M8 and M12 connection. The CTL Grey Series steady/constant camera cable offers power and ground sync and is compatible with constant-operation lights made by Smart Vision Lights. The CTL Grey Series flash/strobe cable is compatible with Smart Vision Lights' OverDrive series of lights and offers power, ground and flash sync.

The CTL Grey Series is also available for other cameras, including Datalogic®, Teledyne Dalsa's BOA®, SICK's Inspector®, and Cognex's In-Sight® and Dataman® models.

More information about the CTL Grey Series of camera-to-light cables for the Baumer VeriSens® XC series camera is available at <http://smartvisionlights.com/baumer>.

#### About Smart Vision Lights

Smart Vision Lights (Muskegon, Mich.) is a leading designer and manufacturer of high-brightness LED lights for industrial applications, including machine vision. Smart Vision Lights products come with universal internal current-control drivers, offering constant or strobed operation, reduced wiring requirements, and easy installation. Smart Vision Lights products also are the safest on the market thanks to the company's in-house IEC 62741 light-testing laboratory, guaranteeing conformity and compliance for your lighting systems, regardless of where they are installed around the globe.
