Packcity Intelligent Parcel Lockers Featured at NAA
Automated electronic parcel lockers will be at Packcity Booth #4128

Brookfield, Wis., June 6, 2016 – [ProShip, Inc.](#), a Neopost company, today announced that it will feature [Packcity Intelligent Parcel Lockers](#), an automated electronic locker system that securely stores packages for easy consumer retrieval, at the National Apartment Association (NAA) conference June 15 – 18, 2016. Packcity experts will be demonstrating the lockers at booth #4128.

The continued increase in e-commerce deliveries means added time and expense for apartment owners and managers in ensuring packages are delivered to the right resident or are stored until the resident picks them up. For a growing number of apartment owners and managers, Packcity Intelligent Parcel Lockers are the perfect solution. Residents receive an electronic notification when their package is delivered and placed into a locker, and they can pick up their package at their convenience 24/7. Packcity Parcel Lockers eliminate the hassle of multiple deliveries and re-delivery attempts, and provide a complete chain-of-custody log to ensure packages are not misplaced or stolen.

“We are excited to showcase our Packcity Intelligent Parcel Lockers at NAA. These innovative parcel lockers provide security, tracking and accountability for package deliveries,” says Mark Aument, Senior Vice President, Sales of ProShip, Inc. “They save time and money for building owners and managers, while providing a convenient, valuable service for residents. Packcity Parcel Lockers are a win-win for building owners, managers, and residents alike.”
