For Immediate Release
Smoked and Snack Meat Manufacturer Selects ProcessPro ERP Software

St. Cloud, MN, June 8, 2016 – – ProcessPro, leading mid-market ERP software solution company, announces that Vermont Smoke & Cure™ has selected ERP software solution, ProcessPro *On-Demand*, to support its premier smoked meats and meat snack manufacturing operation.

"We are very excited to be partnering with ProcessPro. We chose their ERP solution based upon their strengths in the process manufacturing industry and their strong scheduling, purchasing, warehousing, and inventory management solutions," stated Mark Davitt, Vermont Smoke & Cure VP of Finance. "Additionally, their *On-Demand* solution will save us from having to purchase unnecessary hardware and staff an IT department."

Having 30 years of experience implementing ERP software for food manufacturing companies, ProcessPro's team of professionals has ample experience with helping companies move to the next level of manufacturing.

Vermont Smoke & Cure was in need of a user-friendly, integrated solution to assist with their market expansion and ProcessPro *On-Demand* offered the perfect fit with flexibility and limited IT initial investment. Delivering robust lot tracking capabilities, formula management, and production scheduling, Vermont Smoke & Cure will be able to instantly reduce manual, paper-based processes, easily capture quality control data for HACCP, and recognize inventory levels in real-time.

"We're pleased to be partnering with a company that utilizes environmentally friendly manufacturing practices and partners with local ingredient suppliers to craft their one-of-a-kind meat products," stated Joe Blauert, ProcessPro CEO. "*On-Demand* will be an exceptional fit for their needs, streamlining their manufacturing processes."

Vermont Smoke & Cure has been consciously crafting delicious smoked meats and meat snacks since 1962. They use certified humane meats whenever possible and simple local ingredients. VS&C's team of employee-owners make everything in their Smokehouse in Hinesburg, Vermont. Their one-of-a-kind bacon, hot dogs, ham, pepperoni, summer sausage, and meat sticks can be found at retailers nationwide and at www.vermontsmokeandcure.com.

ProcessPro, a division of Open Systems, Inc., is a leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping, inventory, and accounting. ProcessPro has been serving the food, beverage, pharmaceutical, nutritional supplement, cosmetic, and specialty chemical industries for more than 30 years. More information about ProcessPro is available at www.ProcessProERP.com
