

## **LANDMARK FROM PIONEER TECHNOLOGY GROUP NOW PROVIDES FREE FRAUD ALERT SERVICE**

*Pioneer Technology Group is proud to offer a free fraud alert service through their land records management system, Landmark.*

SANFORD, FL, JUNE 14, 2016 – For years, Pioneer Technology Group (PTG) has prided themselves on unparalleled service and quality software for government agencies across the nation. Landmark, a land records management system, provides courts with efficiency gains in processing recorded documents, making them available on the public access site, real time, as soon as they are recorded.

Property Fraud Alert is a notification service that alerts a subscriber via email every time a land records document using a certain name is recorded. Landmark allows users to provide their customers with this fraud detection website completely free, with unlimited name registration. This allows for names to be added and removed on demand without limitations.

The fraud detection website will allow customers to easily register their names and be notified via email if any recording activity uses them. Notifications are sent out daily and include a link directly to the recorded image in Landmark Web for the customer to determine if it was used fraudulently.

There are 27 Landmark counties across the country, and counting. PTG continues to grow, as more counties are drawn to their products and customer service. Building this reputation over time has allowed PTG to offer a new security option for their customers at no additional charge.

Cathy Recker from Putnam County, OH said, “We evaluated numerous O.R. systems, and the Landmark system from Pioneer was the clear choice.”

In addition to Land Records Software, PTG also provides a court case management system, property and bed tax services, tax deed software and, more recently, a jury management tool for courts of all sizes.

### **About Pioneer Technology Group**

Pioneer Technology Group (PTG) is a leading developer of software solutions and services to Governments and the private sector. The company, headquartered in Sanford, Florida, develops and supports the Benchmark court case management system, the Landmark official records system, the YourDox title document system, and tax processing systems for counties and municipalities. PTG also provides content management systems and a scanning services bureau for transitioning paper to digital images through its subsidiary, Pioneer Records Management.
