Toshiba Introduces 1330 kW – 2000 kW G9000 Uninterruptible Power Systems Lineup

HOUSTON, TX — June 15, 2016 — Toshiba International Corporation (TIC) today announced its newest G9000 Series uninterruptible power system (UPS) ratings. The G9000 Series is the largest three-phase UPS designed by Toshiba utilizing fifth-generation insulated-gate bipolar transistor (IGBT) technology configured in a 3-level pulse-width modulation (PWM) architecture enabling these UPSs to be 97% efficient while operating in double-conversion mode, minimizing cooling requirements. Additionally, the G9000 Series 1330 kW – 2000 kW UPS units are field-upgradable, allowing critical power users to increase their capacity as needed.

“The Toshiba G9000 Series UPS 1330 kW – 2000 kW is a premier solution for datacenter and co-location applications which require high reliability, high efficiency, small footprint, and low power usage effectiveness,” said Greg Mack, Vice President and General Manager of the TIC Power Electronics Division. “The G9000 Series, with digital signal processing control provides instantaneous waveform and current response, enabling the highest power quality for all UPS users.”

Jesus Penalver, Product Manager for the TIC Power Electronics Division, added, “For system-redundant high-reliability UPS applications, the Toshiba G9000 Series excels with low system component count, higher efficiency and the ability to grow power system infrastructure along with customer load demands.”

About Toshiba

Toshiba Corporation, a Fortune Global 500 company, channels world-class capabilities in advanced electronic and electrical product and systems into four strategic business domains: Energy Systems & Solutions, Infrastructure Systems & Solutions, Storage & Electronic Devices Solutions Company and Industrial ICT Solutions Company. Guided by the principles of The Basic Commitment of the Toshiba Group, “Committed to People, Committed to the Future,” Toshiba promotes global operations towards securing “Growth Through Creativity and Innovation,” and is contributing to the achievement of a world in which people everywhere live in safe, secure and comfortable society.

Founded in Tokyo in 1875, today’s Toshiba is at the heart of a global network of over 590 consolidated companies employing over 200,000 people worldwide, with annual sales surpassing 6.5 trillion yen (US\$63 billion).

About Toshiba International Corporation

TIC is a Toshiba America Inc. (TAI) Group Company, a wholly owned subsidiary of Toshiba Corporation. TIC is headquartered in Houston, Texas and employs approximately 1,400 people. TIC provides application solutions to a wide range of industries including industrial, power systems, and transmission and distribution systems. For more information about TIC, please visit www.toshiba.com/tic.

About the TIC Power Electronics Division

The TIC Power Electronics division has more than 25 years of experience in uninterruptible power systems. Toshiba produces a versatile range of single-phase and three-phase UPS solutions and accessories hallmarked for outstanding

performance and reliability. Single-phase models range from 1 to 22 kVA, while three-phase single module systems range from 13.5 to 2,000 kW, and three-phase parallel module systems from 90 to 16,000 kW. These systems are suitable for a wide range of applications including data centers, telecommunication, retail, healthcare, broadcasting, and industrial.
