

Altizon to partner with Varroc on their Industry 4.0 initiative

Altizon Systems, a pioneering Industrial Internet of Things company, today announced collaboration with Varroc to implement Industry 4.0 solutions across all its plants.

Varroc, a global leader in automotive component manufacturing is leveraging Altizon's Datonis™ platform for a group wide rollout of multiple Industrial IOT applications. Datonis™ provides a secure, enterprise grade platform with deep support for analytics and machine learning that is apt for Varroc's solution needs.

"Varroc is one of the pioneers in making this push into the realm of Industry 4.0 adoption and we are delighted to partner with them on this journey", said Vinay Nathan, co-founder and CEO of Altizon.

Manoj Vachhani, group CIO, Varroc stated, "Our IOT journey is a part of the digital transformation initiative in Varroc around smart manufacturing. Using Altizon's comprehensive platform offering Datonis™ we can rapidly scale deployments across our plants and cater to our current and future needs for the Industrial Internet of Things".

Increasing number of enterprises are using Altizon's Datonis™ platform, offered on Microsoft Azure, beyond operational dashboards and predictive maintenance solutions, for advanced machine learning driven scorecards and IT/OT integration needs.

About Varroc
