

Signature Technology Group (STG), operating for over 25 years, is a wholly owned subsidiary of Tech Data Corporation, a Fortune 107 company. Our mission is to provide data center services to channel partners, allowing their customers to maximize their technology investments.

Through our channel partners, we serve all types of commercial and public sector entities, including Fortune 100 companies, small private firms, state, local and federal government agencies, and educational institutions.

We have engineers deployed in IT environments, supporting devices and companies throughout North America.

**Make your Data Center
Services Legendary with STG**

Maintenance Services

STG keeps Data Center equipment operating to maximize technology investments. We provide aggregated single vendor support, or work within any current vendor eco-system as a component. Most companies utilize this service to uplift their current onsite warranty service level or as an alternative to extending an OEM's maintenance or warranty contract beyond the initial term.

Staff Augmentation

STG supports client IT staffing needs by providing qualified individuals across a broad range of technologies and specialties for varying lengths of time. IT staffing services include: temporary support, contract-to-hire, and direct hire services.

Professional Services

STG delivers a variety of custom solutions for both hardware deployment and software implementations that ensure the successful operation of a technology environment. Professional Services includes: data center deployment (IMAC-D including endpoint devices), software implementation, and migration services.

Consulting Services

STG offers vendor agnostic data center consulting services that help companies reduce costs, mitigate risk, improve service levels, and increase visibility into their IT environments.
