

Urjanet Utility Data Service Earns Top Product of the Year Award from *Environmental Leader*

Urjanet's automated data service receives top product designation three years in a row

ATLANTA, GA -- June 22, 2016 -- Urjanet, the leading global provider of automated, standardized utility data, today announced that its Utility Data Service received a Top Product of the Year Award in the Environmental Leader Product & Project Awards. Urjanet Utility Data Service is considered by judges to be an exemplary product.

One judge said of Urjanet's Utility Data Service: "Urjanet has been successful with its Utility Data Service because it focuses on solving a specific, difficult problem - collecting and managing utility consumption and cost data - with a unique solution that works well. Organizations looking to reduce energy consumption and costs need accurate data to work with, and the Urjanet platform supports that by automatic collection and normalization of utility bill data including electricity, gas, water, and waste. Urjanet can collect data from over 3,500 global utilities."

Another added, "The product's unique value is demonstrated by the fact that many energy and sustainability service providers have incorporated Urjanet into their own solution offerings. This is a practical solution that has delivered real value to customers and the environment."

The Environmental Leader Product & Project Awards is a program recognizing excellence in products and services that provide companies with energy and environmental benefits. Scores were determined by a panel of independent judges headed by Peter Bussey of LNS Research and also including judges from Ball Aerospace & Technology, BSI Group, C&A, ConAgra Foods, Denver International Airport, ERM, Fetzer Vineyards, General Motors, LNS Research,

MUFG Union Bank, Sears Holding Corporation, Staples, the University of California Berkeley, University of Colorado, US Department of Energy, and USG Corporation.

With rapid advancements and a continuous rate of change in the field, sustainability and energy professionals have a notoriously difficult time knowing what products to choose to help their companies increase energy, environmental, and sustainability performance. The Environmental Leader Product & Project Awards give companies a solid base of products, vetted by experts, from which to choose, as well as a variety of successful projects to illustrate how sustainability and energy management is helping companies improve.

“Each year since the inception of the Environmental Leader Product and Project Awards program, the range and quality of the entries has risen. With the bar set high, the pool of 2016 entrants did not disappoint,” said Peter Bussey, research analyst with LNS Research and judging coordinator for the Product & Project Awards. “The community of providers continues to address the rising demand for cost-effective solutions to address complex environmental, sustainability, and energy management challenges. And end-user organizations are becoming more creative in applying the available solutions to get real results.”

“We are thrilled to be recognized yet again with a Top Product award,” said Sanjoy Malik, CEO of Urjanet. “Our mission is to provide the world with easy access to the critical data organizations need to achieve sustainability goals and manage energy costs and consumption, which means that we are continuously improving our product to meet the needs of an ever-evolving landscape. We are pleased that we have become the standard for utility data and that our data is used by both the world’s biggest corporations and leading energy and sustainability solutions providers.”

About Environmental Leader

Since 2006, Environmental Leader's website and daily email newsletter have provided the definitive and objective voice in reporting on business-related energy, environmental, and sustainability issues, while Energy Manager Today is the leading daily trade publication keeping corporate executives informed about energy management news. For more information visit www.environmentalleader.com or www.energymanagertoday.com.

About the Environmental Leader Product & Project Awards

In its fourth year, the Environmental Leader Product & Project Awards recognize excellence in products and services that provide companies with energy and environmental benefits, or in corporate projects that improved environmental, sustainability or energy management and increased the bottom line. It is a five-point rating system designed to offer companies feedback and recognition. Third-party judges came from the following companies: Ball Aerospace & Technology, BSI Group, C&A, ConAgra Foods, Denver International Airport, ERM, Fetzer Vineyards, General Motors, LNS Research, MUFG Union Bank, Sears Holding Corporation, Staples, the University of California Berkeley, University of Colorado, US

Department of Energy, and USG Corporation. For a complete list of winners, **visit** <http://www.environmentalleader.com/environmental-leader-product-project-awards/>

About Urjanet

Urjanet's mission is to provide the world with easy access to automated utility data. Our cloud-based platform connects directly to utilities to seamlessly acquire and normalize disparate utility bill and interval data. The processed data is delivered directly to industry-leading business applications.

Public and private organizations across the world use Urjanet data to achieve sustainability goals and reduce energy consumption and cost. Urjanet is rapidly becoming the global standard for utility data and powers applications from the leading energy and sustainability solutions providers. Urjanet is a privately-held company headquartered in Atlanta, Georgia. For more information, visit urjanet.com.
