One Day Level I Course—For Fleet Drivers Who Operate Passenger To Mid-Sized (Box) Trucks

Today's fleet operators are faced with the daunting task of mitigating risk and improving driver safety amidst an environment of budgetary constraints and expense cutting measures. Fortunately, experience and statistics show that well-informed decisions and proactive measures can provide your fleet with lasting value and predictable outcomes. Ultimately the biggest factor in determining the likelihood of experiencing a crash is the ability of each driver behind-the-wheel.

LEARNING OBJECTIVES

This Level I course will help to measurably improve a driver's ability to safely and responsibly operate a motorized vehicle. It is designed to help you manage your fleet's risk and provide your drivers with substantially increased competencies to control their vehicles in real-world driving conditions. The goals are to:

- Impart critical safety techniques that include eye techniques as the major sensory component
- Hard-wire skills that enable graduates to appropriately react without hesitation
- Disrupt acceptance of risky driving habits and establish a sustainable self-awareness of driving performance

THE UNIQUE BENEFITS OF TRAINING WITH DRIVING DYNAMICS

THE PROVEN ONE SECOND ADVANTAGE™

Our proprietary, advanced performance driver training curriculum, *The One Second Advantage*, is rooted in research that shows 90 percent of all traffic crashes can be avoided when the driver has just one more second to react and knows what to do with that additional one second.

Adopted by numerous fleet operators across North America—with training delivered to tens of thousands of drivers each year, *The One Second Advantage*

is one way Driving Dynamics has helped individuals and organizations achieve and sustain substantial reductions in fleet crash rates.

FULL-TIME INSTRUCTORS

Driving Dynamics' team of full-time instructors assures that your training investment is maximized. Average tenure of our staff is 15+ years. No pick-up teams or inexperienced trainers here.

Credentials include expertise in advanced performance safety techniques and the ability to perform as competent educators and coaches. Ongoing instructor training and regular performance reviews maintain the highest professional standards for our staff.

DESIGNED TO ENGAGE THE ADULT LEARNER

Our training method comprises classroom education rotated with hands-on driving exercises—leveraging the latest thinking in instructional design to keep the adult learner engaged.

During classroom rotations, instructors present each technique supported by animations and videos. Here trainees are able to comprehend and visualize how to perform these advanced techniques before applying them in the driving exercises that immediately follow each classroom segment.

Technology-enhanced mobile classrooms located on site with driving exercises, a progression-based curriculum and high instructor-to-student ratio means your drivers will spend 60% of their training day behind-the-wheel practicing learned techniques so they become hard-wired skills.

CONTROLLED SLIDE CAR

Before using our patented Controlled Slide Car trainees are first coached on employing advanced techniques effective at preventing or avoiding potentially dangerous driving circumstance.

Both behind-the-wheel and as a passenger of our specialized training vehicle, students have the opportunity to

test newly learned skills and experience real-world driving challenges within a safe, controlled environment.

DEDICATED AND OPEN ENROLLMENT OPTIONS

Our regularly scheduled Open Enrollment, multi-employer option is one of a kind. It allows you to send just one driver or dozens to training offered at more than 200 sites. As an Employer-Dedicated option, this Level I course may be scheduled at times and locations throughout North America that are convenient for your company.

ABOUT DRIVING DYNAMICS

Driving Dynamics has earned its position as an accomplished provider of impactful driver safety training by continually building and delivering programs based on sound research, proven learning methods and expert instruction. We are dedicated to improving drivers' abilities to stay safe and lowering fleet crash rates by leveraging principle-based learning, risk management tools and applied techniques.

A leading provider of advanced performance driver safety training and fleet risk management services throughout North America, our unique and highly effective approach to behind-the-wheel driver education, simulator training, online learning and driver risk management has helped numerous fleet-based organizations achieve significant reductions in their crash rates.
