

ARMORED CLOUD

ARMORED CLOUD®: A PARADIGM SHIFT WHERE SECURITY BECOMES AN ENABLER INSTEAD OF A COMPROMISE

In today's environment of cyber attacks, virtual corporate espionage and need for better security in the ever changing world of the "Internet of Things", Armored Cloud® (AC) offers a suite of unique and innovative solutions to companies looking for competitive leverage and anonymized online activities.

Operating under the philosophy that **"you can't exploit what you can't see"**, AC offers a completely anonymous way for modern companies to **do business, connect global resources, and conduct research online.**

GLOBAL ENTERPRISE MANAGED ATTRIBUTION

Can you imagine a managed attribution security solution capable of delivering anonymous or persona-driven access to real time applications and computing resources **without latency or bandwidth restrictions**? This is possible with Armored Cloud's global network of nimble, sacrificial nodes.

How Can Armored Cloud's Managed Attribution Solution Be Used?

- Stand up anonymous, untraceable sacrificial nodes anywhere in the world on short notice.
- Conduct threat intelligence, competitive research, or investigate the dark web without being traced.
- Enhance your existing cyber threat intelligence tools - make them completely anonymous and untraceable.
- Manage personas anywhere in the world; keep them isolated from your corporate network.

ENTERPRISE MANAGED ATTRIBUTION AND OBFUSCATION

Armored Cloud offers all of this without any servers or leased rack space. No additional hardware investment. No assets to manage or depreciate. Instead, you use our sustainable cloud based infrastructure to gather intelligence and conduct research with low overhead. Demos and free trials available to qualified organizations.
